

19-445.2000. State Procurement Regulations.

A. General.

These Regulations issued by the South Carolina ~~Budget and Control Board~~[State Fiscal Accountability Authority](#), hereafter referred to as the board, establish policies, procedures, and guidelines relating to the procurement, management, control, and disposal of supplies, services, information technology, and construction, as applicable, under the authority of the South Carolina Consolidated Procurement Code, as amended. These Regulations are designed to achieve maximum practicable uniformity in purchasing throughout state government. Hence, implementation of the Procurement Code by and within governmental bodies, as defined in Section 11-35-310(18) of the Procurement Code, shall be consistent with these Regulations. Nothing contained in these Rules and Regulations shall be construed to waive any rights, remedies or defenses the State might have under any laws of the State of South Carolina.

B. Organizational Authority.

(1) The Chief Procurement Officers acting on behalf of the board shall have the responsibility to audit and monitor the implementation of these Regulations and requirements of the South Carolina Consolidated Procurement Code. In accordance with Section 11-35-510 of the Code, all rights, powers, duties and authority relating to the procurement of supplies, services, and information technology and to the management, control, ~~and~~ [warehousing](#), ~~sale and disposal~~ of supplies, construction, information technology, and services now vested in or exercised by any governmental body under the provisions of law relating thereto, and regardless of source funding, are hereby vested in the appropriate chief procurement officers. [In exercising this authority, the chief procurement officers shall afford each using agency reasonable opportunity to participate in and make recommendations with respect to procurement matters affecting the using agency.](#) The chief procurement officers shall be responsible for developing such organizational structure as necessary to implement the provisions of the Procurement Code and these Regulations.

(2) Materials Management Office: The Materials Management Officer is specifically responsible for:

(a) developing a system of training and certification for procurement officers of governmental bodies in accordance with Section 11-35-1030;

(b) recommending differential dollar limits for direct procurements on the basis of but not limited to the following:

(1) procurement expertise,

(2) commodity,

(3) service,

(4) dollar;

(c) performing procurement audits of governmental bodies in accordance with Sections ~~11-35-70 and~~ 11-35-1230 [and 11-35-5340](#) of the Procurement Code.

(d) overseeing acquisitions for the State by the State Procurement Office.

(e) coordinating with the Information Technology Management Office in accordance with Section 11-35-820;

(f) overseeing the acquisition of procurements by the State Engineer in accordance with Section 11-35-830.

(3) Office of Information Technology Management: The Office of Information Technology Management shall be responsible for all procurements involving information technology pursuant to Section 11-35-820 of the Procurement Code.

(4) Office of State Engineer: The Office of State Engineer under the direction and oversight of the Materials Management Officer shall be responsible for all procurements involving construction, architectural and engineering, construction management, and land surveying services pursuant to Section 11-35-830 of the Procurement Code.

C. Definitions

(1) “Head of purchasing agency” means the agency head, that is, the individual charged with ultimate responsibility for the administration and operations of the governmental body. Whenever the South Carolina Consolidated Procurement Code or these Regulations authorize either the chief procurement

officer or the head of the purchasing agency to act, the head of the purchasing agency is authorized to act only within the limits of the governmental body's authority under Section 11-35-1210, except with regard to acts taken pursuant to Section 11-35-1560 and 11-35-1570.

(2) "Procuring Agency" means "purchasing agency" as defined in Section 11-35-310.

(3) "Certification" means the authority delegated by the board or the Director of Procurement Services to a governmental body to make direct procurements not under term contracts. Certification is granted pursuant to Section 11-35-1210 and R.19-445.2020.

(4) "Responsible procurement officer" means the individual employed by either the purchasing agency or the chief procurement officers, as applicable, assigned to serve as the procurement officer, as defined in Section 11-35-310, and responsible for administering the procurement process. Typically, the responsible procurement officer will be identified by name in the solicitation, as amended, and any subsequent contracts, as amended.

#### D. Duty to Report Violations

All governmental bodies shall comply in good faith with all applicable requirements of the consolidated procurement code and these procurement regulations. When any information or allegations concerning improper or illegal conduct regarding a procurement governed by the consolidated procurement code comes to the attention of any employee of the State, immediate notice of the relevant facts shall be transmitted to the appropriate chief procurement officer.

#### E. ~~Reserved~~ Application of the Procurement Code.

(1) Other Required Approvals. Approval pursuant to the Code or regulations does not substitute for any other approval required by law. For example, if the Procurement Code applies to an acquisition and the overall arrangement involves either construction or the granting or acquiring any interest in real property, other independent processes or approval may be required by law, e.g., Sections 1-11-55, 1-11-56, 1-11-58, 1-11-65, or Chapter 47 of Title 2.

(2) Multiple Instruments Not Determinative. The application of the Code does not depend on whether the parties memorialize the overall transaction into one or more contractual instruments. As a remedial statute, the Consolidated Procurement Code should be construed liberally to carry out its purposes. (Section 11-35-20) Accordingly, when multiple written agreements are part of an overall transaction to accomplish an overall purpose, the documents will be considered together for purposes of determining whether the Consolidated Procurement Code applies, even if the instruments have not been executed simultaneously or the parties are not the same.

(3) Revenue generating contracts. The Consolidated Procurement Code "applies to every procurement . . . by this State under contract acting through a governmental body . . ." (Section 11-35-40(2)) "The term 'contract' means "all types of state agreements, regardless of what they may be called, for the procurement . . . of . . . supplies, services, information technology, or construction." (Section 11-35-310(8)) In pertinent part, the term "procurement" is defined as "buying, purchasing, renting, leasing, or otherwise acquiring any . . . construction." (Section 11-35-310(25) (emphasis added.)) Accordingly, the Procurement Code applies even though the governmental body does not make a payment of money. Without limitation, examples of such contracts include revenue-generating contracts, concession agreements, and contracts structured as a design-build-finance-operate-maintain project. (Section 11-35-2910(8))

(4) Financed Construction. The Consolidated Procurement Code "applies to every procurement . . . by this State under contract acting through a governmental body . . ." (Section 11-35-40(2)) The term "contract" means "all types of state agreements, regardless of what they may be called, for the procurement . . . of . . . construction." (Section 11-35-310(18)) In pertinent part, the term "procurement" is defined as "buying, purchasing, renting, leasing, or otherwise acquiring any . . . construction." (Section 11-35-310(25) (emphasis added)) The term "construction" is defined as "the process of building . . . any . . . public improvements of any kind to real property." (Section 11-35-310(7)) Read together, and absent an applicable exclusion (e.g., gifts) or exemption (e.g., Section 11-35-710), the Procurement Code applies to every acquisition of the process of improving real property by a governmental body, whether or not the acquisition involves an expenditure of money. Such acquisitions may be memorialized in a number of

related agreements and, without limitation, may be structured as an in-kind exchange, lease-purchase, lease with purchase option, lease-lease-back, sale-lease-back, installment-purchase, or so-called public-private-partnership.

(5) Acquisition involving an interest in real property. Generally, the Procurement Code does not apply to an acquisition solely of an interest in real property. For example, the Procurement Code does not apply to an acquisition of land, even though it includes pre-existing improvements and fixtures (i.e., not built-to-suit), nor does it apply to an acquisition of a leasehold estate, even though it includes complementary subordinate supplies, services, information technology, or construction (e.g., landlord-performed tenant improvements for a lease not-to-own, building security, janitorial services). In contrast, the Procurement Code does apply to an acquisition of an interest in real property if the transaction also involves a substantial acquisition of supplies, services, information technology, or construction. For example, and without limitation, the Procurement Code would apply to an acquisition of food services, even though it involved the agency leasing its land to the contractor. As another example, as discussed in R.19-445.2000E(4), a lease-purchase of custom-built, new construction must be acquired pursuant to the Procurement Code. While not necessarily conclusive, the primary objective of the transaction may be determinative.

F. Notice.

(1) When adequate public notice is required by Article 5, the notice must contain sufficient information to allow a prospective offeror to make an informed business judgment as to whether she should compete (or would have competed) for the contract. At minimum the notice must contain the following information, as applicable:

- (a) a description of the item(s) to be acquired;
- (b) how to obtain a copy of the solicitation document or the anticipated contract;
- (c) when and where responses are due; and
- (d) the place of performance or delivery.

(2) In addition to the information above, the notices required by Section 11-35-1560 and Section 11-35-1570 must include the contract dollar amount of the proposed contract.

19-445.2005. Internal Procurement Procedures; Procurement Records.

A. Procedures Manual.

All governmental bodies shall develop and maintain an internal procurement procedures manual and forward a copy, and any revisions, of such to the Materials Management Officer. Upon receipt of the respective governmental body's internal procurement procedures manual, the Materials Management Office shall be responsible for the following review:

(1) Determine that written internal operations procedures as submitted (a) are consistent with the South Carolina Consolidated Procurement Code and Regulations, (b) are consistent with any policies or procedures published by the chief procurement officers for their respective areas of responsibility, and (c) establish a clear means by which vendors can identify the governmental body's procurement officers and the limits of their authority.

(2) Notify the governmental body of its findings in writing.

B. Procurement Records.

Each governmental body must maintain procurement files sufficient to satisfy the requirements of external audit.

19-445.2010. Disclosure of Procurement Information.

A. Reserved.

B. Prior to the issuance of an award or notification of intent to award, whichever is earlier, state personnel involved in an acquisition shall forward or refer all requests for information regarding the procurement to the responsible procurement officer. The procurement officer will respond to the request.

C. Prior to the issuance of an award or notification of intent to award, whichever is earlier, state personnel involved in an acquisition shall not engage in conduct that knowingly furnishes source selection

information to anyone other than the responsible procurement officer, unless otherwise authorized in writing by the responsible procurement officer. “Source selection information” means any of the following information that is related to or involved in the evaluation of an offer (e.g., bid or proposal) to enter into a procurement contract, if that information has not been previously made available to the public or disclosed publicly: (1) Proposed costs or prices submitted in response to an agency solicitation, or lists of those proposed costs or prices, (2) source selection plans, (3) technical evaluation plans, (4) technical evaluations of proposals, (5) cost or price evaluations of proposals, (6) information regarding which proposals are determined to be reasonably susceptible of being selected for award, (7) rankings of responses, proposals, or competitors, (8) reports, evaluations of source selection committees or evaluations panels, (9) other information based on a case-by-case determination by the procurement officer that its disclosure would jeopardize the integrity or successful completion of the procurement to which the information relates.

D. In procurements conducted pursuant to Section 11-35-1530 or Section 11-35-1535, state personnel with access to proposal information shall not disclose either the number of offerors or their identity prior to the issuance of an award or notification of intent to award, whichever is earlier, except as otherwise required by law.

E. Prior to the issuance of an award or notification of intent to award, whichever is earlier, the procurement officer shall not release to any individual information obtained in response to an RFP, without first obtaining from that individual a written agreement, in a form approved by the responsible chief procurement officer, regarding restrictions on the use and disclosure of such information. Such agreements are binding and enforceable. [Before allowing any individual to perform any role in discussions, negotiations, evaluation, or the source selection decision in a procurement conducted pursuant to Section 11-35-1530 or Section 11-35-1535, the responsible procurement officer must obtain from that individual, in a form approved by the appropriate chief procurement officer, a written acknowledgement of compliance and an agreement to comply with rules designed to protect the integrity of the procurement process.](#)

F. The release of a proposal to non-state personnel for evaluation does not constitute public disclosure or a release of information for purposes of the Freedom of Information Act.

G. Except as prohibited by law, and subject to section 2200, state contracts may include clauses restricting the state’s release of documents and information received from a contractor if those documents are exempt from disclosure under applicable law.

H. Subject to item (E), any person may furnish source selection information to the Office of the State Engineer. The procurement officer shall provide to the Office of the State Engineer any information it requests regarding a procurement.

I. Non-Public Solicitations. In accordance with Section 11-35-410(E), information that forms a part of a specific solicitation need not be publicly available if (a) the information is otherwise exempt from disclosure by law (e.g., Chapter 4, Title 30 (The Freedom of Information Act)), (b) the information is available to any prospective offeror that has executed a nondisclosure agreement (NDA), and (c) the appropriate chief procurement officer has approved the use and terms of an NDA for the solicitation at issue. Prior to use in a specific solicitation, the terms of a proposed NDA must be published in the solicitation unless otherwise approved by the CPO. When requesting approval from the appropriate chief procurement officer, the governmental body must identify the information to be released pursuant to the NDA, explain the reason for the request, cite the legal basis for not making the information publicly available, and provide any other information requested by the CPO. If governmental body declines a person’s request to enter an NDA and acquire the information thereto, it must immediately notify the CPO. Consistent with R.19-445.2030, the applicable solicitation should instruct bidders how to comply with the NDA when submitting their offer. Information to be released pursuant to the NDA may also be released in accordance with R.19-445.2200 (Administrative Review Protective Orders).

[19-445.2015-Ratification](#)

~~A. Upon finding after award that a State employee has made an unauthorized award of a contract or that a contract award is otherwise in violation of law, the appropriate official may ratify or affirm the contract or terminate it in accordance with this section. The contract may be terminated and reasonable termination costs, if any, may be awarded as provided in this section. The contract may be ratified and affirmed only if it is in the best interests of the State. The decision required by this subsection A may be made by the chief procurement officer, the head of a purchasing agency, or a designee of either officer, above the level of the person responsible for the person committing the act. If the value of the contract exceeds one hundred thousand dollars, the chief procurement officer must concur in the written determination before any action is taken on the decision.~~

~~B. All decisions to ratify or Terminate a contract shall be supported by a written determination of appropriateness. In addition, the appropriate official shall prepare a written determination as to the facts and circumstances surrounding the act, what corrective action is being taken to prevent recurrence, and the action taken against the individual committing the act. Any governmental body shall submit quarterly a record listing all decisions required by subsection A to the chief procurement officers. A copy of the record shall be submitted to the board on an annual basis and shall be available for public inspection.~~

~~C. Except as provided in subsection D, If a contract is terminated pursuant to subsection A, the State shall, where possible and by agreement with the supplier, return the supplies delivered for a refund at no cost to the State or at a minimal restocking charge. If a termination claim is made, settlement shall be made in accordance with the contract. If there are no applicable termination provisions in the contract, settlement shall be made on the basis of actual costs directly or indirectly allocable to the contract through the time of termination. Such costs shall be established in accordance with generally accepted accounting principles. Profit shall be proportionate only to the performance completed up to the time of termination and shall be based on projected gain or loss on the contract as though performance were completed. Anticipated profits are not allowed.~~

~~D. Upon finding after award that an award is in violation of law and that the recipient of the contract acted fraudulently or in bad faith, the appropriate chief procurement officer shall declare the contract null and void unless it is determined in writing that there is a continuing need for the supplies, services, information technology, or construction under the contract and either (i) there is no time to re-award the contract under emergency procedures or otherwise; or (ii) the contract is being performed for less than it could be otherwise performed. If a contract is voided, the State shall endeavor to return those supplies delivered under the contract that have not been used or distributed. no further payments shall be made under the contract and the State is entitled to recover the greater of (i) the difference between payments made under the contract and the contractor's actual costs up until the contract was voided, or (ii) the difference between payments under the contract and the value to the State of the supplies, services, information technology, or construction it obtained under the contract. The State may in addition claim damages under any applicable legal theory.~~

~~E. Regardless of its ratification and affirmation of a contract, the State shall be entitled to any damages it can prove under any theory including but not limited to contract and tort.~~

#### 19-445.2015. Unauthorized or Illegal Procurements.

##### A. Decision to Ratify or Declare Void

(1) Upon discovering after award either (a) that a person lacking actual authority has made an unauthorized award or modification of a contract or (b) that a contract award or modification is otherwise in violation of the Consolidated Procurement Code or these regulations, the appropriate official, as defined in section G below, must decide to either ratify the contract in accordance with this regulation or acknowledge and declare the contract null and void. If ratified, the contract may be continued or terminated. The contract may be ratified only if ratification is in the interest of the State.

(2) The factors pertinent in determining the State's interest include, but are not limited to: (a) the seriousness of the procurement deficiency; (b) the degree of prejudice to the integrity of the competitive procurement system;

(c) the good faith of the public officials and contractors involved; (d) the extent of performance; (e) the costs to the State in either terminating the contract or declaring it null and void, if any; (f) the urgency of the acquisition; and (g) the impact on the using agency's mission.

B. Decision to Continue or Terminate Contract. If a contract is ratified, the appropriate official must decide to either (1) continue the contract, or (2) terminate the contract and proceed as provided in section C below. A contract award or modification that is in violation of the Consolidated Procurement Code or these regulations may be continued only if the appropriate official determines an urgent and compelling need exists that cannot otherwise be met without undue burden on the State. If no such urgent and compelling need exists, the ratified contract must be terminated and the State shall proceed as provided in section C below. A contract that was ratified solely because a person lacking actual authority made an unauthorized award or modification, as described in item A(1)(a) above, does not require an urgent and compelling need to support its continuation.

C. Settlement of Terminated Contracts. If a contract is terminated as allowed by this regulation, the State shall, as appropriate and by agreement with the supplier, return any supplies delivered for a refund at no cost to the State or at a minimal restocking charge. If a contract is terminated and a termination claim is made, settlement shall be made in accordance with the contract. If there are no applicable termination provisions in the contract, settlement shall be made on the basis of actual costs directly or indirectly allocable to the contract through the time of termination. Such costs shall be established in accordance with generally accepted accounting principles. Profit shall be proportionate only to the performance completed up to the time of termination and shall be based on projected gain or loss on the contract as though performance were completed. Anticipated profits are not allowed.

D. Settlement of Void Contracts. If a contract is acknowledged as null and void pursuant to section A above, the State shall endeavor to return those supplies delivered under the contract that have not been used or distributed, and no further payments shall be made under the contract. In addition, the State is entitled to recover the greater of (1) the difference between payments made under the contract and the contractor's actual costs up until the contract was declared null and void, or (2) the difference between payments under the contract and the value to the State of the supplies, services, information technology, or construction it obtained under the contract.

E. Bad Faith. Notwithstanding section D above, the State is entitled to recover all amounts paid if the appropriate official determines that the recipient of the contract acted in bad faith. Bad faith shall not be assumed. Without limitation, specific findings showing deception, dishonesty, reckless disregard of clearly applicable laws or regulations, or deliberate breach of contract scope limits, support a finding of bad faith.

F. State's Remedies Not Limited. Regardless of its ratification of a contract, the State shall be entitled to any damages it can prove under any theory including but not limited to contract and tort.

G. Appropriate Official. The appropriate official to make the decisions authorized by sections A, B, and E above, or the determination addressed in item H(2) below, is the chief procurement officer, the head of a purchasing agency, or, for a contract with a total potential value no greater than \$100,000, a designee of either officer, above the level of the person responsible for the person committing or authorizing the act. If a contract award or modification is made in violation of the Consolidated Procurement Code or these regulations, and the value of the contract exceeds the certification of the purchasing agency or one hundred thousand dollars, the chief procurement officer must concur in the written determination before any further action is taken, unless the contract is declared null and void. In all circumstances, the chief procurement officer must concur in any determination finding bad faith.

H. Determinations.

(1) All decisions authorized by sections A, B, and E above shall be supported by a written determination of appropriateness conforming to the requirements of Section 11-35-210.

(2) The written determination must include the facts and circumstances surrounding the improper act, what corrective action is being taken to prevent recurrence, and the action taken against the individual committing the act.

(3) In most circumstances, the decisions authorized by sections A, B, and E above are unnecessary for a contract that has been completely performed. Accordingly, the determination in those instances maybe limited to the information required by subsection H(2).

I. Reporting. Every quarter, each governmental body shall submit to the Materials Management Officer a record listing all contract awards or modifications discovered as described in item A(1) above, along with copies of the applicable written determinations. The Materials Management Officer shall submit a copy of the record to the board on an annual basis and such record shall be available for public inspection.

J. Miscellaneous.

(1) In the context of an administrative review conducted under Article 17, sections G, H, and I above are inapplicable, and the appropriate official to make the decision authorized by sections A, B, and E is the chief procurement officer or Procurement Review Panel, as applicable.

(2) This Regulation does not apply to a determination pursuant to R.19-445.2085C.

19-445.2017. Pre-solicitation Procedures.

A. General.

(1) This regulation prescribes best practices for pre-solicitation activities in acquisitions of supplies, services, or information technology, including acquisition planning, market research, and exchanges with industry. Nothing in section A, B, or C of this regulation shall provide an independent basis for administrative review pursuant to Article 17.

(2) Using agencies shall perform acquisition planning and conduct market research for all acquisitions of supplies, services, or information technology. The extent of planning and research will vary, depending on such factors as estimated dollar value, complexity, and past experience, as well as the nature of the supplies, services or information technology to be acquired.

(3) Except for procurements conducted pursuant to Section 11-35-1550, no solicitation for offers shall proceed until the using agency has certified in writing that it has complied with this regulation. If the using agency lacks authority to conduct the procurement, the using agency shall provide the responsible procurement officer the opportunity to fully participate in all aspects of any pre-solicitation activities conducted by the using agency.

(4) The using agency must document its acquisition planning and market research in sufficient detail to satisfy the requirements of an audit. This documentation shall be made a part of the procurement file.

(5) The appropriate chief procurement officer or his designee may require the using agency to conduct additional market research or provide additional documentation of the using agency's planning and research activities.

(6) The chief procurement officers shall provide guidance which shall be followed by all agencies conducting acquisition planning and market research, including considerations pertinent to determining the adequacy of planning and research activities.

B. Acquisition Planning.

(1) The purpose of acquisition planning is to ensure that the using agency meets its needs in the most effective, economical, and timely manner. The planning should promote and provide for:

(a) Clearly defining the agency's needs;

(b) Acquisition of commercially available items to the maximum extent practicable;

(c) Full and open competition to the maximum extent practicable, with due regard to the nature of the supplies, services, or information technology to be acquired;

(d) Selection of appropriate source selection method and contract type; and

(e) Appropriate consideration of the use of term contracts to fulfill the requirement, before awarding new contracts.

(2) Acquisition planning should begin as soon as the agency need is identified, preferably well in advance of when contract award or order placement is necessary. Agency staff should avoid issuing requirements on an urgent basis or with unrealistic delivery or performance schedules, since it generally impedes advantageous outcomes, restricts competition, and increases prices.

(3) Acquisition planning shall integrate the efforts of all personnel responsible for significant aspects of the acquisition. If and as commensurate with the value and complexity of the acquisition, the agency shall form a team consisting of all those who will be responsible for significant aspects of the acquisition, such as procurement, fiscal, legal, and technical personnel. If contract performance is to be in a designated operational area, the agency should also consider including operations staff or “end users,” as appropriate.

C. Market Research.

(1) Acquisitions begin with a description of the agency’s needs stated in terms sufficient to allow conduct of market research. Using agencies shall conduct market research appropriate to the circumstances to arrive at the most suitable approach to acquiring supplies, services, and information technology. Agencies should conduct market research when planning a new acquisition, or for a new type of supplies, services, or information technology; before requisitioning an acquisition, or requesting delegated authority to conduct an acquisition in excess of the agency’s certification; and on an ongoing basis (to the maximum extent practicable), to effectively identify the capabilities of small businesses, new entrants into government contracting, and new commercially available items, for meeting the agency’s requirements.

(2) Agencies should use the results of market research to determine if sources capable of satisfying the agency’s requirements exist; determine if commercially available items exist that meet the agency’s requirements; and determine the practices of firms engaged in producing, distributing, and supporting the supplies, services or information technology to be acquired, such as type of contract, type and relationship of businesses involved in such contracts (e.g., subcontractors, suppliers, distributors, integrators) and, common industry contract terms or specifications, including without limitation, terms for contract duration, payment, warranties, maintenance and packaging, marking, and any other contract terms relevant to the proposed acquisition..

D. Exchanges with industry before receipt of proposals.

(1) Exchanges of information among all interested parties, from the earliest identification of a requirement through receipt of proposals, are encouraged. Any exchange of information must be consistent with Regulation 19-445.2010, Disclosure of Procurement Information. Interested parties include potential offerors, end users, agency acquisition and supporting personnel, and others involved in the conduct or outcome of the acquisition. The purpose of exchanging information is to improve the understanding of agency requirements and industry capabilities, thereby allowing potential offerors to judge whether or how they can satisfy the State’s requirements, and enhancing the State’s ability to obtain quality supplies, services, information technology, and construction, at reasonable prices, and increase efficiency in proposal preparation, proposal evaluation, negotiation, and contract award.

(2) Agencies are encouraged to promote early exchanges of information about future acquisitions. An early exchange of information among industry and the program manager, responsible procurement officer, and other participants in the acquisition process can identify and resolve concerns regarding the acquisition strategy, including proposed contract type, terms and conditions, and acquisition planning schedules; the feasibility of the requirement, including performance requirements, statements of work, and data requirements; the suitability of the proposal instructions and evaluation criteria; the availability of reference documents; and any other industry concerns or questions.

(3) Techniques to promote early exchanges of information include industry conferences; public hearings; market research, as described in section C above; presolicitation notices; draft RFPs; requests for information (RFIs); presolicitation conferences; and site visits. They may also include one-on-one meetings with potential offerors. In conducting exchanges, agencies should take measures to comply with Chapter 13, Title 8 of the South Carolina Code (Ethics, Government Accountability and Campaign Reform Act); R.19-445.2010 (Disclosure of Procurement Information); R.19-445.2127 (Organizational Conflicts of Interest); and R.19-445.2165 (Gifts). However, any such meetings that are substantially involved with potential specifications or contract terms and conditions must comply with the restrictions on disclosure of information in subsection D(6) below.

(4) To encourage industry response, a using agency may publish notice of its plans to conduct pre-solicitation exchanges in South Carolina Business Opportunities and other publications likely to reach potential offerors.

(5) RFIs may be used when the agency does not presently intend to award a contract, but wants to obtain price, delivery, other market information, or capabilities for planning purposes. Responses to these notices are not offers and cannot be accepted by the agency to form a binding contract. There is no required format for RFIs.

(6) General information about agency mission needs and future requirements may be disclosed at any time. In addition to the controls in R.19-445.2010, the responsible procurement officer must control any exchange with potential offerors after release of the solicitation. When specific information about a proposed acquisition that would be necessary or advantageous for the preparation of proposals is disclosed to one or more potential offerors, that information must be made available to the public as soon as practicable, but no later than the next general release of information, in order to avoid creating an unfair competitive advantage. When conducting a presolicitation conference, materials distributed at the conference should be made available to all potential offerors, upon request.

19-445.2020. Certification.

A. Review Procedures.

(1) Unless otherwise authorized by statute, any governmental body that desires to make direct agency procurements in excess of \$50,000.00, shall contact the Materials Management Officer in writing to request certification in any area of procurement, including the following ~~four~~ areas:

- (a) Supplies and services;
- (b) ~~Consultant services~~Reserved;
- (c) ~~Construction and~~, including, subject to Section 11-35-3220(9), construction-related professional services;
- (d) Information technology.

(2) The Materials Management Officer shall review and report on the particular governmental body's entire internal procurement operation to include, but not be limited to the following:

- (a) Adherence to provisions of the South Carolina Consolidated Procurement Code and these Regulations;
- (b) Procurement staff and training;
- (c) Adequate audit trails and purchase order register;
- (d) Evidences of competition;
- (e) Small purchase provisions and purchase order confirmation;
- (f) Emergency and sole source procurements;
- (g) Source selections;
- (h) File documentation of procurements;
- (i) Decisions and determinations made pursuant to section 2015;
- (j) Adherence to any mandatory policies, procedures, or guidelines established by the appropriate chief procurement officers;
- (k) Adequacy of written determinations required by the South Carolina Consolidated Procurement Code and these Regulations;
- (l) Contract administration;
- (m) Adequacy of the governmental body's system of internal controls in order to ensure compliance with applicable requirements.

(3) The report required by item A(2) shall be submitted to the board.

B. Approval  
(1)(a) Upon recommendation by the Materials Management Officer, the Director of the Division of Procurement Services may authorize the particular governmental body to make direct agency procurements in the areas described in item A(1)(a) and A(1)(d), not under term contracts, in an amount up to one hundred fifty thousand dollars, provided a report required by item A(2) has been prepared within two years preceding the request.

(b) Upon recommendation by the State Engineer based on her knowledge of and experience with the particular governmental body, the Director of the Division of Procurement Services may authorize the particular governmental body to make direct agency procurements in the areas described in item A(1)(c), not under term contracts, in an amount up to one hundred fifty thousand dollars.

(c) The director shall advise the board in writing of all authorizations granted pursuant to this section B.  
(2) If a governmental body requests certification above one hundred fifty thousand dollars, the request, along with the recommendation of the Materials Management Officer and the report required by item A(2), shall be submitted to the board. Upon recommendation by the Materials Management Officer and approval by the board, the particular governmental body may be certified and assigned a dollar limit below which the certified governmental body may make direct agency procurements not under term contracts.

(3) Certification under item B(1) or B(2) shall be in writing and specify:

- (a) The name of the governmental body;
- (b) Any conditions, limits or restrictions on the exercise of the certification;
- (c) The duration of the certification; and
- (d) The procurement areas in which the governmental body is certified.

C. Using the criteria listed in item A(2) above, the office of each chief procurement officer shall be reviewed at least ~~every~~every five years by the audit team of the Materials Management Office. The results of the audit shall be provided to the appropriate chief procurement officer and the ~~designated board officer~~Executive Director of the Authority.

D. Limitations.

- (1) Such certification as prescribed in section B shall be subject to any term contracts established by the chief procurement officers which ~~requires~~require mandatory procurement by all governmental bodies.
- (2) Such certification as prescribed in section B ~~may~~shall be subject to maintaining an adequate staff of qualified or certified procurement officers.

19-445.2022. Temporary Suspension of Authority; Audit.

A. Suspension of Authority.

Within his area of authority, the appropriate chief procurement officer may temporarily suspend a governmental body's power to conduct all, any type of, or any value of procurements if the chief procurement officer concludes that the governmental body either (1) lacks adequate internal controls to ensure compliance with the procurement laws, (2) lacks qualified or adequate staff, or (3) has otherwise acted in a manner that, in the opinion of the chief procurement officer, warrants a temporary loss of authority. The chief procurement officer may make continued suspension contingent upon corrective action, e.g., retain additional staff, training, revised internal controls. The suspension is effective upon delivery of written notice to the head of the purchasing agency. The written notice shall state the duration of the temporary suspension, which may not extend beyond the next regularly scheduled audit to be conducted pursuant to Section 11-35-1320. A chief procurement officer may not limit direct agency procurements below \$25,000.00. Before issuing a suspension pursuant to this paragraph, a chief procurement officer shall consult with the other chief procurement officers.

B. Audit.

In order to monitor the implementation of the procurement process, the appropriate chief procurement officer has the authority to audit any governmental body regarding one or more procurement activities.

19-445.2025. Authority to Contract for Certain Services; Definitions.

A. Consultant Services.

(1) For the purposes of these Regulations, consultant services shall be defined as follows: An individual, partnership, corporation or any other legally established organization performing consulting services for or providing consulting advice to the State of South Carolina, or any governmental body thereof, over whom the State or governmental body has the right of control as to the result to be accomplished but not as to the details and means by which that result is to be accomplished.

(2) Services which fall within this definition shall be procured in accordance with the Code and these Regulations.

B. Employee Services.

(1) For the purposes of these Regulations, employee services shall be defined as follows: An individual performing services directly for the State of South Carolina, or any governmental body thereof, over whom the State or governmental body has the right of control not only as to the result to be accomplished by the work but also as to the details and means by which that work is to be accomplished.

(2) Services which fall within this definition shall be procured in accordance with State personnel policies and procedures.

C. Employment Services.

(1) For the purposes of these Regulations, employment services shall be defined as follows: An individual performing services indirectly for the State of South Carolina, or any governmental body thereof, whose services are obtained through a private employment agency. The employee employer relationship exists between the private employment agency and its employee. The State, or any governmental body, will contract with the private employment agency for the services of its employees.

(2) Services which fall within this definition shall be procured in accordance with the Code and these Regulations.

D. Legal Services.

Prior to the award of any state contract for the services of attorneys, approval for such services shall be obtained by the governmental body from the State Attorney General.

E. Auditing Services.

Prior to the award of any state contract for auditing or accounting services, approval for such services shall be obtained by the governmental body from the State Auditor.

19-445.2027. Electronic Commerce.

A. "Electronic commerce" means electronic techniques for accomplishing business transactions including electronic mail or messaging, World Wide Web technology, electronic bulletin boards, purchase cards, electronic funds transfer, and electronic data interchange.

B. General.

(1) The State may use electronic commerce whenever practicable or cost-effective. The use of terms commonly associated with paper transactions (e.g., "copy," "document," "page," "printed," "sealed envelope," and "stamped") shall not be interpreted to restrict the use of electronic commerce. The responsible procurement officer may supplement electronic transactions by using other media to meet the requirements of any contract action governed by the Consolidated Procurement Code (e.g., transmit hard copy of drawings).

(2) Agencies may exercise broad discretion in selecting the information technology that will be used in conducting electronic commerce. However, the head of each agency shall ensure that systems, technologies, procedures, and processes used by the agency to conduct electronic commerce—

(a) Are implemented uniformly throughout the agency, to the maximum extent practicable;

(b) Are implemented only after considering the full or partial use of existing infrastructures;

(c) Facilitate access to State acquisition opportunities by as many persons as practicable, including small businesses, minority business enterprises, and socially and economically disadvantaged small businesses;

(d) Include a means of providing widespread public notice of acquisition opportunities and a means of responding to notices or solicitations electronically;

(e) Comply with applicable standards that broaden interoperability and ease the electronic interchange of information; and

(f) Are capable of ensuring authentication and confidentiality commensurate with the risk and magnitude of the harm from loss, misuse, or unauthorized access to or modification of the information.

(3) Agencies using the procurement functionality of the South Carolina Enterprise Information System are deemed to have complied with subsection (B)(2) of this regulation.

(4) Consistent with provisions of the Uniform Electronic Transactions Act, Sections 26-6-10, et seq., agencies may accept electronic signatures and records in connection with State contracts.

C. Submission of Offers by Electronic Commerce. Subject to all other applicable regulations (e.g., R.19-445.2045 and -2050), the responsible procurement officer may authorize use of electronic commerce for

submission of bids and proposals. If electronic submissions are authorized, the solicitation shall specify the electronic commerce method(s) that offerors may use. Offers submitted by electronic commerce shall be considered only if the electronic commerce method was specifically stipulated or permitted by the solicitation.

19-445.2030. Competitive Sealed Bidding—The Invitation for Bids.

A. The invitation for bids shall be used to initiate a competitive sealed bid procurement and shall include the following, as applicable:

(1) instructions and information to bidders concerning the bid submission requirements, including the time and date set for receipt of bids, the individual to whom the bid is to be submitted, the address of the office to which bids are to be delivered, the maximum time for bid acceptance by the State, and any other special information;

(2) the purchase description, evaluation factors, delivery or performance schedule, and such inspection and acceptance requirements as are not included in the purchase description;

(3) the contract terms and conditions, including warranty and bonding or other security requirements, as applicable; and

(4) Instructions to bidders on how to visibly mark information which they consider to be exempt from public disclosure.

~~(5)~~B. Adequate notice of the invitation for bids must be given at a reasonable time before the date set forth in it for the opening of bids. Accordingly, bidding time will be set to provide bidders a reasonable time to prepare their bids. Without limiting the foregoing requirements, the date of opening may not be less than seven (7) days after notice of the solicitation is provided as required by Section 11-35-1520(3), unless a shorter time is deemed necessary for a particular procurement as determined in writing by the Chief Procurement Officer or the head of the purchasing agency or his designee.

19-445.2040. The Official State Government Publication.

A. Specifications of Publication.

The name of the official state government publication shall be known as the “South Carolina Business Opportunities.” It shall be published by the Materials Management Office at least weekly. The purpose is to provide a listing of proposed procurements of construction, information technology, supplies, services and other procurement information of interest to the business community. Except as otherwise provided by law, the publication will be available to all interested parties by ~~subscription and distributed by mail or electronic media posting on a public-facing Internet site.~~ Contents shall be limited to inclusion of proposed procurements required by regulations and such other business information as approved by the Materials Management Officer. Publication of proposed procurements of a classified nature or emergencies may be excluded from publication.

B. Availability in Public Libraries.

~~Each publication of the “South Carolina Business Opportunities” shall be distributed to public libraries within the State.~~

19-445.2042. Pre-Bid Conferences.

A. Pre-bid conferences may be conducted. The conference should be held long enough after the Invitation for Bids has been issued to allow bidders to become familiar with it, but sufficiently before bid opening to allow consideration of the conference results in preparing their bids. Notice of the conference must be included in the notice of the solicitation required by Articles 5 or 9 of this code.

B. Nothing stated at the pre-bid conference shall change the Invitation for Bids unless a change is made by written amendment. A potential bidder’s failure to attend an advertised pre-bid conference will not excuse its responsibility for estimating properly the difficulty and cost of successfully performing the work, or for proceeding to successfully perform the work without additional expense to the State.

C. Pre-bid conferences may not be made mandatory absent a written determination by the head of the governmental body or his designee that the unique nature of the procurement justifies a mandatory pre-bid conference and that a mandatory pre-bid conference will not unduly restrict competition.

D. To minimize the time and expense imposed on industry by pre-bid conferences, the procurement officer should arrange for attendance by electronic means to the maximum extent practicable.

19-445.2045. Receipt, Safeguarding, and Disposition of Bids.

A. Procedures Prior to Bid Opening.

All bids (including modifications) received prior to the time of opening shall be kept secure and, except as provided in subsection B below, unopened. Necessary precautions shall be taken to insure the security of the bid. Prior to bid opening, information concerning the identity and number of bids received shall be made available only to the state employees, and then only on a “need to know” basis. When bid samples are submitted, they shall be handled with sufficient care to prevent disclosure of characteristics before bid opening.

B. Unidentified Bids.

Unidentified bids may be opened solely for the purpose of identification, and then only by an official specifically designated for this purpose by the Chief Procurement Officer, the procurement officer of the governmental body, or a designee of either officer. If a sealed bid is opened by mistake, the person who opens the bid will immediately write his signature and position on the envelope and deliver it to the aforesaid official. This official shall immediately write on the envelope an explanation of the opening, the date and time opened, the invitation for bids’ number, and his signature, and then shall immediately reseal the envelope.

C. When bids or proposals are rejected, or a solicitation cancelled after bids or proposals are received, the bids or proposals which have been opened shall be retained in the procurement file; or, if unopened, otherwise disposed of. Unopened bids or proposals are not considered to be public information under Chapter 4 of Title 30 (Freedom of Information Act).

19-445.2050. Bid Opening.

A. Procedures.

The procurement officer of the governmental body or his designee shall decide when the time set for bid opening has arrived, and shall so declare to those present. In the presence of one or more state witnesses, he shall then personally and publicly open all bids received prior to that time, and read aloud so much thereof as is practicable, including prices, to those persons present and have the bids recorded. The amount of each bid and such other relevant information, together with the name of each bidder, shall be tabulated and certified in writing as true and accurate by both the person opening the bids and the witness. The tabulation shall be open to public inspection.

B. If it becomes necessary to postpone a bid opening, the procurement officer shall issue the appropriate amendments to the solicitation postponing or rescheduling the bid opening. When the purchasing agency is closed due to force majeure, bid opening will be postponed to the same time on the next official business day.

C. Disclosure of Bid Information.

Only the information disclosed by the procurement officer of the governmental body or his designee at bid opening is considered to be public information under the Freedom of Information Act, Chapter 4 of Title 30, until after the issuance of an award or notification of intent to award, whichever is earlier.

19-445.2055. Bid Acceptance and Bid Evaluation.

When necessary for the best interest of the State, bid criteria to determine acceptability may include inspection, testing, quality, workmanship, delivery and suitability for a particular purpose. Those criteria that will affect the bid price and be considered in evaluation for award shall be measurable costs to include, but not be limited to, discounts, transportation costs, total or life cycle costs.

19-445.2060. ~~Telegraphic Bids Repealed.~~

~~The Invitation for Bids may state that electronic, telegraphic, and mailgram bids will be considered whenever they are received in hand at the designated office by the time and date set for receipt of bids. Such electronic, telegraphic, or mailgram bids shall contain specific reference to the Invitation for Bids; the items, quantities, and prices for which the bid is submitted; the time and place of delivery; and a statement that the bidder agrees to all the terms, conditions, and provisions of the Invitation for Bids.~~

19-445.2065. Rejection of Bids.

A. Unless there is a compelling reason to reject one or more bids, award will be made to the lowest responsible and responsive bidder. Every effort shall be made to anticipate changes in a requirement prior to the date of opening and to notify all prospective bidders of any resulting modification or cancellation, thereby permitting bidders to change their bids and preventing the unnecessary exposure of bid prices. As a general rule after opening, an invitation for bids should not be canceled and readvertised due solely to increased quantities of the items being procured; award should be made on the initial invitation for bids and the additional quantity required should be treated as a new procurement.

B. Cancellation of Bids Prior to Award.

(1) When it is determined prior to the issuance of an award or notification of intent to award, whichever is earlier, but after opening, that the requirements relating to the availability and identification of specifications have not been met, the invitation for bids shall be cancelled. Invitations for bids may be cancelled after opening, but prior to award, when such action is consistent with subsection A above and the procurement officer determines in writing that:

- (a) inadequate or ambiguous specifications were cited in the invitation;
- (b) specifications have been revised;
- (c) the supplies, services, information technology, or construction being procured are no longer required;
- (d) the invitation did not provide for consideration of all factors of cost to the State, such as cost of transporting state furnished property to bidders' plants;
- (e) bids received indicate that the needs of the State can be satisfied by a less expensive article differing from that on which the bids were invited;
- (f) all otherwise acceptable bids received are at unreasonable prices;
- (g) the bids were not independently arrived at in open competition, were collusive, or were submitted in bad faith; or
- (h) for other reasons, cancellation is clearly in the best interest of the State.

(2) Determinations to cancel invitations for bids shall state the reasons therefor.

C. Extension of Bid Acceptance Period.

Should administrative difficulties be encountered after bid opening which may delay award beyond bidders' acceptance periods, the several lowest bidders should be requested, before expiration of their bids, to extend the bid acceptance period (with consent of sureties, if any) in order to avoid the need for re-advertisement.

19-445.2070. Rejection of Individual Bids.

A. General Application.

Any bid which fails to conform to the essential requirements of the invitation for bids shall be rejected.

B. Alternate Bids.

Any bid which does not conform to the specifications contained or referenced in the invitation for bids may be rejected unless the invitation authorized the submission of alternate bids and the supplies offered as alternates meet the requirements specified in the invitation.

C. Any bid which fails to conform to the delivery schedule, to permissible alternates thereto stated in the invitation for bids, or to other material requirements of the solicitation may be rejected as nonresponsive.

D. Modification of Requirements by Bidder.

(1) Ordinarily a bid should be rejected when the bidder attempts to impose conditions which would modify requirements of the invitation for bids or limit his liability to the State, since to allow the bidder to

impose such conditions would be prejudicial to other bidders. For example, bids should be rejected in which the bidder:

- (a) attempts to protect himself against future changes in conditions, such as increased costs, if total possible cost to the State cannot be determined;
- (b) fails to state a price and in lieu thereof states that price shall be “price in effect at time of delivery;”
- (c) states a price but qualified such price as being subject to “price in effect at time of delivery;”
- (d) when not authorized by the invitation, conditions or qualifies his bid by stipulating that his bid is to be considered only if, prior to date of award, bidder receives (or does not receive) award under a separate procurement;
- (e) requires the State to determine that the bidder’s product meets state specifications; or
- (f) limits the rights of the State under any contract clause.

(2) Bidders may be requested to delete objectionable conditions from their bid provided that these conditions do not go to the substance, as distinguished from the form, of the bid or work an injustice on other bidders. Bidder should be permitted the opportunity to furnish other information called for by the Invitation for Bids and not supplied due to oversight, so long as it does not affect responsiveness.

#### E. Price Unreasonableness.

Any bid may be rejected if the [responsible](#) procurement officer determines in writing that it is unreasonable as to price.

#### F. Bid Security Requirement.

When a bid security is required and a bidder fails to furnish it in accordance with the requirements of the invitation for bids, the bid shall be rejected.

#### G. Exceptions to Rejection Procedures.

Any bid received after the procurement officer of the governmental body or his designee has declared that the time set for bid opening has arrived, shall be rejected unless the bid had been delivered to the location specified in the solicitation or the governmental bodies’ mail room which services that location prior to the bid opening.

#### 19-445.2075. All or None Qualifications.

Unless the invitation for bids so provides, a bid is not rendered nonresponsive by the fact that the bidder specifies that award will be accepted only on all, or a specified group, of the items included in the invitation for bids. However, bidders shall not be permitted to withdraw or modify “all or none” qualifications after bid opening since such qualification is substantive and affects the rights of the other bidders.

#### 19-445.2077. Bid Samples and Descriptive Literature.

A. “Descriptive literature” means information available in the ordinary course of business which shows the characteristics, construction, or operation of an item which enables the State to consider whether the item meets its needs.

B. “Bid sample” means a sample to be furnished by a bidder to show the characteristics of the item offered in the bid.

C. Bid samples or descriptive literature may be required when it is necessary to evaluate required characteristics of the items bid.

D. The Invitation for Bids shall state that bid samples or descriptive literature should not be submitted unless expressly requested and that, regardless of any attempt by a bidder to condition the bid, unsolicited bid samples or descriptive literature which are submitted at the bidder’s risk will not be examined or tested, and will not be deemed to vary any of the provisions of the Invitation for Bids.

#### 19-445.2080. Bid Reductions.

The responsible procurement officer may accept a voluntary reduction in price from a low bidder after bid opening but prior to award; provided that such reduction is not conditioned on, nor results in, the modification or deletion of any conditions contained in the invitation for bids.

2020 Amendments to Regs - Cumulative Redline of Changes

19-445.2085. Correction or Withdrawal of Bids; Cancellation of Awards.

A. General Procedure.

(1) A bidder or offeror must submit in writing a request to either correct or withdraw a bid to the procurement officer. Each written request must document the fact that the bidder's or offeror's mistake is clearly an error that will cause him substantial loss. All decisions to permit the correction or withdrawal of bids shall be supported by a written determination of appropriateness made by the chief procurement officers or head of a purchasing agency, or the designee of either.

(2) Confirmation of Bid. When the responsible procurement officer knows or has reason to conclude that a mistake may have been made, she should request the bidder to confirm the bid. Situations in which confirmation should be requested include obvious, apparent errors on the face of the bid or a bid unreasonably lower than the other bids submitted. Consistent with R.19-445.2010, -2050C, and -2095C, the responsible procurement officer should only disclose information that is publicly available when confirming a bid. If the bidder asserts a mistake, the bid may be corrected or withdrawn only if allowed by regulation (e.g., R.19-445.2085A and B and R.19-445.2095I(2)(d)).

B. Correction Creates Low Bid.

To maintain the integrity of the competitive sealed bidding system, a bidder shall not be permitted to correct a bid mistake after bid opening that would cause such bidder to have the low bid unless the mistake is clearly evident from examining the bid document; for example, extension of unit prices or errors in addition.

C. Cancellation Of Award Prior To Performance.

After an award or notification of intent to award, whichever is earlier, has been issued but before performance has begun, the award or contract may be canceled and either re-awarded or a new solicitation issued or the existing solicitation canceled, if the Chief Procurement Officer determines in writing that:

- (1) Inadequate or ambiguous specifications were cited in the invitation;
- (2) Specifications have been revised;
- (3) The supplies, services, information technology, or construction being procured are no longer required;
- (4) The invitation did not provide for consideration of all factors of cost to the State, such as cost of transporting state furnished property to bidders' plants;
- (5) Bids received indicate that the needs of the State can be satisfied by a less expensive article differing from that on which the bids were invited;
- (6) The bids were not independently arrived at in open competition, were collusive, or were submitted in bad faith;
- (7) Administrative error of the purchasing agency discovered prior to performance, or
- (8) For other reasons, cancellation is clearly in the best interest of the State.

19-445.2090. Award.

A. Application.

The contract shall be awarded to the lowest responsible and responsive bidder(s) whose bid meets the requirements and criteria set forth in the invitation for bids.

B. The procurement officer shall issue the notice of intent to award or award on the date specified in the solicitation, unless the procurement officer determines, and gives notice, that a longer review time is necessary. The procurement officer shall give notice of the revised posting date in accordance with Section 11-35-1520(10).

19-445.2095. Competitive Sealed Proposals.

A. Request for Proposals.

The provisions of ~~Regulation~~Regulations 19-445.2030B and 19-445.2040 shall apply to implement the requirements of Section 11-35-1530 (2), Public Notice.

B. Receipt ~~and~~, Safeguarding, and Disposition of Proposals.

The provisions of Regulation 19-445.2045 shall apply ~~for the receipt and safeguarding of~~ competitive sealed proposals.

C. Receipt of Proposals.

The provisions of Regulation 19-445.2050(B) shall apply to ~~the receipt and safeguarding of~~ competitive sealed proposals. For the purposes of implementing Section 11-35-1530(3), Receipt of Proposals, the following requirements shall be followed:

- (1) Proposals shall be opened publicly by the procurement officer or his designee in the presence of one or more witnesses at the time and place designated in the request for proposals. Proposals and modifications shall be time-stamped upon receipt and held in a secure place until the established due date. After the date established for receipt of proposals, a Register of Proposals shall be prepared which shall include for all proposals the name of each offeror, the number of modifications received, if any, and a description sufficient to identify the item offered. The Register of Proposals shall be certified in writing as true and accurate by both the person opening the proposals and the witness. The Register of Proposals shall be open to public inspection only after the issuance of an award or notification of intent to award, whichever is earlier. Proposals and modifications shall be shown only to State personnel having a legitimate interest in them and then only on a “need to know” basis. Contents and the identity of competing offers shall not be disclosed during the process of opening by state personnel.
- (2) As provided by the solicitation, offerors must visibly mark all information in their proposals that they consider to be exempt from public disclosure.

D. [Repealed]

E. Clarifications and Minor Informalities in Proposals.

The provisions of Section 11-35-1520(13) shall apply to competitive sealed proposals.

F. Specified Types of Construction.

Consistent with Section 48-52-670, which allows the use of competitive sealed proposals, it is generally not practicable or advantageous to the State to procure guaranteed energy, water, or wastewater savings contracts by competitive sealed bidding.

G. Procedures for Competitive Sealed Proposals.

The appropriate Chief Procurement Officer may develop and issue procedures which shall be followed by all agencies using the competitive sealed proposal method of acquisition. Unless excused by the State Engineer, the Office of State Engineer shall oversee (1) the evaluation process for any procurement of construction if factors other than price are considered in the evaluation of a proposal, and (2) any discussions with offerors conducted pursuant to Section 11-35-1530(6) or subsection I below.

H. Other Applicable Provisions.

The provisions of the following Regulations shall apply to competitive sealed proposals:

- (1) Regulation 19-445.2042, Pre-Bid Conferences,
- (2) Regulation 19-445.2060, Telegraphic and Electronic Bids,
- (3) Regulation 19-445.2075, All or None Qualifications,
- (4) Regulation 19-445.2085, Correction or Withdrawal of Bids; Cancellation of Awards, and Cancellation of Awards Prior to Performance.
- (5) Regulation 19-445.2137, Food Service Contracts.

I. Discussions with Offerors

(1) Classifying Proposals.

For the purpose of conducting discussions under Section 11-35-1530(6) and item (2) below, proposals shall be initially classified in writing as:

- (a) acceptable (i.e., reasonably susceptible of being selected for award);
- (b) potentially acceptable (i.e., reasonably susceptible of being made acceptable through discussions); or
- (c) unacceptable.

(2) Conduct of Discussions.

If discussions are conducted, the procurement officer shall exchange information with all offerors who submit proposals classified as acceptable or potentially acceptable. The content and extent of each

exchange is a matter of the procurement officer's judgment, based on the particular facts of each acquisition. In conducting discussions, the procurement officer shall:

- (a) Control all exchanges;
- (b) Advise in writing every offeror of all deficiencies in its proposal, if any, that will result in rejection as non-responsive;
- (c) Attempt in writing to resolve uncertainties concerning the cost or price, technical proposal, and other terms and conditions of the proposal, if any;
- (d) Resolve in writing suspected mistakes, if any, by calling them to the offeror's attention.
- (e) Provide the offeror a reasonable opportunity to submit any cost or price, technical, or other revisions to its proposal, but only to the extent such revisions are necessary to resolve any matter raised by the procurement officer during discussions under items (2)(b) through (2)(d) above.

(3) Limitations. Offerors shall be accorded fair and equal treatment with respect to any opportunity for discussions and revisions of proposals. Ordinarily, discussions are conducted prior to final ranking. Discussions may not be conducted unless the solicitation alerts offerors to the possibility of such an exchange, including the possibility of limited proposal revisions for those proposals reasonably susceptible of being selected for award.

(4) Communications authorized by Section 11-35-1530(6) and items (1) through (3) above may be conducted only by procurement officers authorized by the appropriate chief procurement officer.

#### J. Rejection of Individual Proposals.

(1) Proposals need not be unconditionally accepted without alteration or correction, and to the extent otherwise allowed by law, the State's stated requirements may be clarified after proposals are submitted. This flexibility must be considered in determining whether reasons exist for rejecting all or any part of a proposal. Reasons for rejecting proposals include but are not limited to:

- (a) the business that submitted the proposal is nonresponsible as determined under Section 11-35-1810;
- (b) the proposal ultimately (that is, after an opportunity, if any is offered, has passed for altering or clarifying the proposal) fails to meet the announced requirements of the State in some material respect; or
- (c) the proposed price is clearly unreasonable.

(2) The reasons for cancellation or rejection shall be made a part of the procurement file and shall be available for public inspection.

#### K. ~~Reserved~~ Negotiations.

[\(1\) Prior to initiating negotiations under Section 11-35-1530\(8\), the using agency must document its negotiation objectives.](#)

[\(2\) The responsible procurement officer must participate in, control, and document all negotiations.](#)

#### L. Delay in Posting Notice of Intent to Award or Award.

Regulation 19-445.2090B shall apply to competitive sealed proposals.

#### 19-445.2097. Rejection of Proposals.

A. Unless there is a compelling reason to reject one or more proposals, award will be made to the highest ranked responsible offeror or otherwise as allowed by Section 11-35-1530. Every effort shall be made to anticipate changes in a requirement prior to the date of opening and to notify all prospective offerors of any resulting modification or cancellation.

#### B. Cancellation of Solicitation Prior to Award.

(1) When it is determined prior to the issuance of an award or notification of intent to award, whichever is earlier, but after opening, that the requirements relating to the availability and identification of specifications have not been met, the request for proposals shall be cancelled. A request for proposals may be cancelled after opening, but prior the issuance of an award or notification of intent to award, whichever is earlier, when such action is consistent with subsection A above and the procurement officer determines in writing that:

- (a) inadequate or ambiguous specifications were cited in the solicitation;
- (b) specifications have been revised;
- (c) the supplies, services, information technology, or construction being procured are no longer required;

- (d) the solicitation did not provide for consideration of all factors of cost to the State, such as cost of transporting state furnished property to bidders' plants;
  - (e) proposals received indicate that the needs of the State can be satisfied by a less expensive article differing from that on which the proposals were requested;
  - (f) all otherwise acceptable proposals received are at unreasonable prices;
  - (g) the proposals were not independently arrived at in open competition, were collusive, or were submitted in bad faith; or
  - (h) for other reasons, cancellation is clearly in the best interest of the State.
- (2) Determinations to cancel a request for proposals shall state the reasons therefor.

C. Extension of Bid Acceptance Period.

Should administrative difficulties be encountered after opening which may delay award beyond offeror's acceptance periods, the relevant offerors should be requested, before expiration of their offers, to extend the acceptance period (with consent of sureties, if any).

19-445.2098. Rejection of Individual Proposals.

A. Proposals need not be unconditionally accepted without alteration or correction, and to the extent otherwise allowed by law, the State's stated requirements may be clarified after proposals are submitted. This flexibility must be considered in determining whether reasons exist for rejecting all or any part of a proposal.

B. Reasons for rejecting proposals include but are not limited to:

- (1) the business that submitted the proposal is nonresponsible as determined under Section 11-35-1810;
- (2) the proposal ultimately (that is, after an opportunity, if any is offered, has passed for altering or clarifying the proposal) fails to meet the announced requirements of the State in some material respect; or
- (3) the proposed price is unreasonable.

C. The reasons for rejection shall be made a part of the procurement file and shall be available for public inspection.

D. Exceptions to Rejection Procedures.

Any proposal received after the procurement officer of the governmental body or his designee has declared that the time set for opening has arrived, shall be rejected unless the proposal had been delivered to the location specified in the solicitation or the governmental body's mail room which services that location prior to the bid opening.

19-445.2099. Competitive Negotiations.

A. General

(1) Competitive negotiations are governed by

R.19-445.~~2030(5)~~2030B, -2040, -2042, -2045, -2050B, -2085C,

-2090B, -2095C, -2095J, and -2098. Regulation 19-445-2097 (Rejection of Proposals) applies to competitive negotiations except that R.19-445.2099(K)(1) is substituted for R.19-445.2097A.

(2) Documentation required by this Regulation 19-445.2099 must be prepared at the time the process to be documented is conducted.

(3) For each competitive negotiation the head of the using agency or his designee must appoint in writing an individual to serve as the selection executive (SE). The SE must be an individual who has sufficient rank and professional experience to effectively carry out the functions of an SE. Subject to the authority and approval of the responsible procurement officer, the SE shall—

- (a) Recommend an acquisition team, tailored for the particular acquisition, that includes appropriate contracting, legal, logistics, technical, and other expertise to ensure a well-developed solicitation, a comprehensive evaluation of offers, and effective negotiations;
- (b) Approve the acquisition plan and the solicitation before solicitation release;
- (c) Ensure consistency among and sufficiency of the solicitation requirements, evaluation factors and subfactors, solicitation provisions or contract clauses, and data requirements;

(d) Ensure that proposals are evaluated based solely on the factors and subfactors contained in the solicitation;

(e) Consider the recommendations of subject matter experts, advisory boards or panels (if any); and

(f) Select the source or sources whose proposal is the best value to the State, as provided in R.19-445.2099K.

(4) Consistent with Section 11-35-1535(A)(3), competitive negotiated acquisitions may be conducted only by the office of the appropriate chief procurement officer; accordingly, a chief procurement officer may not delegate to a using agency the authority to conduct a competitive negotiation.

#### B. Procedures for Competitive Negotiations.

The Division of Procurement Services may develop and issue procedures which shall be followed when using the competitive negotiations method of acquisition.

#### C. Definitions

Clarification means any communication in which the responsible procurement officer requests or accepts information that clarifies any information in a proposal. Clarification does not include the request or acceptance of any change to the terms of an offer.

Competitive range means the offeror or group of offerors selected for negotiation.

Deficiency means any term of an offer that does not conform to a material requirement of a solicitation. A material requirement is one that affects the price, quantity, quality, delivery, or other performance obligations of the contract.

Negotiation means any communication, oral or written, that invites or permits an offeror to change any texts or graphics in the terms of its offer in any way. Negotiation does not include communications involving (i) information that is necessary to understand an offer, but that does not change any text or graphics in the offer, (ii) information about the offeror, or (iii) any other information that will not bind the parties upon acceptance of an offer.

Offer means those portions of a proposal that constitute a written promise or set of promises to act or refrain from acting in a specified way, so made as to manifest a commitment to be bound by those promises upon acceptance by the State. Offer does not include mere descriptions of approaches, plans, intentions, opinions, predictions, or estimates; statements that describe the offeror's organization or capability; or any other statements that do not make a definite and firm commitment to act or refrain from acting in a specified way.

Proposal means the information submitted to the State in response to a request for proposals. The information in a proposal includes (i) the offer, (ii) information explaining the offer, (iii) information about the offeror, and (iv) any other information that is relevant to source selection decision making.

Weakness means a flaw in the proposal that increases the risk of unsuccessful contract performance. A "significant weakness" in the proposal is a flaw that appreciably increases the risk of unsuccessful contract performance.

#### D. Amending the solicitation

(1) When, either before or after receipt of proposals, the State changes its requirements or terms and conditions, the responsible procurement officer shall amend the solicitation.

(2) When, after the receipt of proposals, the State discovers that material inadequacies of the solicitation have contributed to technical or pricing deficiencies, the responsible procurement officer shall amend the solicitation to resolve the inadequacies, preferably prior to proceeding further with the procurement process.

(3) If a proposal of interest to the State involves a desirable departure from the stated requirements, the responsible procurement officer shall amend the solicitation, preferably prior to completion of proposal evaluation pursuant to F(1), provided this can be done without revealing to the other offerors the alternate solution proposed or any other information that is entitled to protection (see Regulation 19-445.2099I).

(4) Amendments issued after the established time and date for receipt of proposals may not exceed the general scope of the request for proposals and must be issued to those offerors that have not been eliminated from the competition.

(5) If, based on market research or otherwise, an amendment proposed for issuance after offers have been received is so substantial as to exceed what prospective offerors reasonably could have anticipated, so that additional sources likely would have submitted offers had the substance of the amendment been known to them, the responsible procurement officer shall cancel the original solicitation and issue a new one, regardless of the stage of the acquisition.

E. Evaluation Factors

(1) The award decision is based on evaluation factors and significant subfactors that are tailored to the acquisition.

(2) Evaluation factors and significant subfactors must—

(a) Represent the key areas of importance and emphasis to be considered in the source selection decision; and

(b) Support meaningful comparison and discrimination between and among competing proposals.

(3) The evaluation factors and significant subfactors that apply to an acquisition and their relative importance are within the broad discretion of the responsible procurement officer, subject to the following requirements:

(a) Price or cost to the State shall be evaluated unless the responsible procurement officer documents the reasons price or cost is not an appropriate evaluation factor for the acquisition and that decision is approved by the head of the using agency.

(b) The quality of the item to be acquired shall be addressed in every source selection through consideration of one or more non-cost evaluation factors such as past performance, compliance with solicitation requirements, technical excellence, management capability, personnel qualifications, and prior experience.

(c) Past performance shall be evaluated unless the responsible procurement officer documents the reasons past performance is not an appropriate evaluation factor for the acquisition.

(4) All factors and significant subfactors that will affect contract award and their relative importance shall be stated clearly in the solicitation. The rating method need not be disclosed in the solicitation.

(5) The request for proposals must state the relative importance of all factors to be considered in evaluating proposals but need not state a numerical weighting for each factor.

(6) If price is an evaluation factor, the solicitation must state whether all evaluation factors other than cost or price, when combined, are significantly more important than, approximately equal to, or significantly less important than cost or price.

F. Evaluation Process

(1) General. Proposal evaluation is an assessment of the proposal and the offeror's ability to perform the prospective contract successfully. All proposals shall be evaluated and, after evaluation, their relative qualities must be assessed solely on the factors and subfactors specified in the solicitation. The relative strengths, deficiencies, significant weaknesses, and risks supporting proposal evaluation shall be documented in the contract file.

(2) Evaluation methods. Evaluations may be conducted using any rating method or combination of methods, including color or adjectival ratings, numerical weights, and ordinal rankings.

(3) Cost or price evaluation. The responsible procurement officer shall document the cost or price evaluation. Price reasonableness shall be determined independently of cost or price evaluation.

(4) Past performance evaluation.

(a) Past performance information is one indicator of an offeror's ability to perform the contract successfully. The currency and relevance of the information, source of the information, context of the data, and general trends in contractor's performance shall be considered. This comparative assessment of past performance information is separate from the responsibility determination.

(b) The solicitation shall provide offerors an opportunity to identify past or current contracts (including Federal, State, and local government and private) for efforts similar to the stated requirement. The solicitation shall also authorize offerors to provide information on problems encountered on the identified contracts and the offeror's corrective actions. When evaluating an offeror's past performance, this

information, as well as information obtained from any other sources, must be considered; however, the relevance of similar past performance information is a matter of business judgment.

(c) The evaluation should take into account past performance information regarding predecessor companies, key personnel who have relevant experience, or subcontractors that will perform major or critical aspects of the requirement when such information is relevant to the instant acquisition.

(5) Technical evaluation. The source selection records shall include—

(a) An assessment of each offeror's ability to accomplish the technical requirements; and

(b) A summary, matrix, or quantitative ranking, along with appropriate supporting narrative, of each technical proposal using the evaluation factors.

G. Exchanges with offerors.

(1) Control. The responsible procurement officer shall control all exchanges after opening and prior to award.

(2) Fairness and Impartiality. The responsible procurement officer shall treat all offerors fairly and impartially when deciding whether and when to seek clarification or to negotiate. Similarly-situated offerors shall be given similar opportunities to clarify and, if in the competitive range, to negotiate.

(3) Clarifications. The responsible procurement officer may conduct clarifications at any time prior to the award decision.

(4) Competitive Range.

(a) After complying with Section 11-35-1535(G) (Evaluation), and before negotiating with anyone, the responsible procurement officer shall establish a competitive range comprised of the offerors that submitted the most promising offers.

(b) Ordinarily, the competitive range should not include more than three offerors. The responsible procurement officer may select only one offeror and may select more than three. The rationale for establishment of, and every modification to, the competitive range shall be determined in writing.

(c) Prior to conducting the minimum negotiations required by Section 11-35-1535(I)(3)(b)(i) and R.19-445.2099H(2), otherwise promising offerors should not be excluded from the competitive range due solely to deficiencies that are reasonably susceptible of correction.

(d) After conducting the minimum negotiations required by 11-35-1535(I)(3)(b)(i) and R.19-445.2099H(2), the responsible procurement officer may eliminate an offeror from the competitive range if the offeror is no longer considered to be among the most promising.

(e) Offerors excluded or otherwise eliminated from the competitive range may request a debriefing.

H. Negotiations with offerors

(1) Negotiations – General.

(a) The responsible procurement officer shall participate in and control all negotiations.

(b) The primary objective of negotiation is to maximize the State's ability to obtain best value, based on the requirements and the evaluation factors set forth in the solicitation.

(c) The State may use any method of communication.

(d) Prior to any negotiation session, the using agency must document its prenegotiation objectives with regard to each offeror in the competitive range.

(e) The responsible procurement officer shall prepare a record of each negotiation session.

(f) Negotiations may include bargaining. Bargaining includes persuasion, alteration of assumptions and positions, give-and-take, and may apply to price, schedule, technical requirements, type of contract, or other terms of a proposed contract.

(g) The responsible procurement officer may not relax or change any material requirement of the solicitation during negotiation except by amendment in accordance with R.19-445.2099D.

(h) Negotiations may include pricing. The responsible procurement officer may state a price that the State is willing to pay for what has been offered and may tell an offeror its price standing.

(i) Subject to the following requirements, the scope and extent of negotiations are a matter of the responsible procurement officer's judgment:

(i) Section 11-35-30 (Obligation of Good Faith);

(ii) R.19-445.2099G(2) (Fairness and Impartiality); and

(iii) R.19-445.2099H(2) (Minimum Negotiations).

(j) The State may engage in more than one session with an offeror if necessary. Subject to R.19-445.2099G(2), the conduct of multiple sessions with a particular offeror does not require the conduct of multiple sessions with other offerors.

(k) Throughout the competitive negotiation process, state personnel shall not disclose the content of any offeror's proposal to any other offeror.

(l) State personnel shall not promise that the State will select an offeror for award if it makes a particular change or set of changes to its offer.

(2) Negotiations – Minimum – Problem Identification

The State shall negotiate with each offeror in the competitive range. At a minimum, the State shall identify and seek the correction of any deficiency and the elimination of any other undesirable term in an offer.

(3) Negotiations – Enhancement.

(a) The responsible procurement officer may negotiate with offerors in the competitive range to seek changes in their offers that the State desires and to allow them to make other improvements.

(b) The responsible procurement officer may state specific terms that the State desires and seek improvements in already acceptable terms.

(4) Proposal Revisions.

(a) The responsible procurement officer may request or allow proposal revisions either (i) to clarify and document understandings reached during negotiations, or (ii) to provide offerors an opportunity to respond to an amendment.

(b) If an offeror's proposal is eliminated or otherwise removed from the competitive range, no further revisions to that offeror's proposal shall be accepted or considered.

(c) Upon the completion of all negotiations, the responsible procurement officer shall request that offerors still in the competitive range submit final offers not later than a specified common cutoff date and time that allows a reasonable opportunity for submission. When submitting final offers, an offeror may revise any aspect of its offer. The responsible procurement officer shall notify offerors that failure to submit a final offer by the common cutoff date and time will result in the consideration of their last prior offer. Requests for final offers shall advise offerors that final offers shall be in writing and that the government intends to make award without obtaining further revisions.

I. Limitations on exchanges. State personnel involved in the acquisition shall not engage in conduct that—

(1) Favors one offeror over another;

(2) Reveals an offeror's technical solution, including unique technology, innovative and unique uses of commercial items, or any information that would compromise an offeror's intellectual property to another offeror;

(3) Reveals the names of individuals providing reference information about an offeror's past performance; or

(4) Knowingly furnishes source selection information in violation of Regulation 19-445.2010.

J. Tradeoff Process

(1) A tradeoff process is appropriate when it may be in the interest of the State to consider award to other than the lowest priced offeror or other than the highest technically rated offeror.

(2) This process permits tradeoffs among cost or price and non-cost factors and allows the State to accept other than the lowest priced proposal. The perceived benefits of the higher priced proposal shall merit the additional cost, and the rationale for tradeoffs must be documented in the file.

K. Award

(1) Unless there is a compelling reason to reject proposals, award must be made to the responsible offeror whose final proposal meets, in all material respects, the requirements announced in the solicitation, as amended, and is determined in writing to provide the best value to the State, taking into consideration the evaluation factors set forth in the request for proposals and, if price is an evaluation factor, any tradeoffs

among price and non-price factors. Award must be based on a comparative assessment of final proposals from offerors within the competitive range against all source selection criteria in the solicitation.

(2) The contract file must document the basis on which the award is made, and the documentation must explain and justify the rationale for any business judgments and tradeoffs made or relied on in the award determination, including benefits associated with additional costs. Although the rationale for the selection decision must be documented, that documentation need not quantify the tradeoffs that led to the decision.

(3) The contract file must document who performed the functions required by sections F, J, and K of R.19-445.2099 and which functions they performed.

#### 19-445.2100. Small Purchases and Other Simplified Purchasing Procedures.

##### A. Authority.

(1) An agency may make small purchases not exceeding the limits prescribed in Section 11-35-1550 in accordance with the procedures in that section and herein.

(2) Any purchase of supplies, services, or information technology made pursuant to Section 11-35-1550 must be within the agency's certification.

(3) These simplified acquisition procedures shall not be used for items available under mandatory state term contracts (see R.19-445-2020B(1)).

(4) Contracts solely for the procurement of commercially available off-the-shelf products pursuant to Section 11-35-1550 are not subject to laws identified in Section 11-35-2040.

(5) When required, adequate public notice must comply with R.19-445.2000F.

(6) Section 11-35-4210(1)(d) makes the protest process inapplicable to contracts with an actual or potential value of up to \$50,000. Because the protest process applies to all small purchases in excess of \$50,000, notice of an award must be communicated to all bidders on the same date award is made and must be documented in the procurement file. Any method of communication may be used.

##### B. Purchases pursuant to Section 11-35-1550(2)(b) (Three Written Quotes).

(1) If an agency does not receive responsive quotes from at least three responsible bidders, adequate public notice must be given and documented with the purchase requisition. So-called "no bids" are not bona fide and do not count as one of the three.

(2) Requests for quotes must be distributed equitably among qualified suppliers, unless adequate public notice is given in South Carolina Business Opportunities.

##### C. Purchases pursuant to Section 11-35-1550(2)(c) (Advertised Small Purchase) may be made by giving adequate public notice in South Carolina Business Opportunities and:

(1) issuing a written solicitation for written quotes, as described in Section 11-35-1550(2)(c);

(2) soliciting bids in accordance with Section 11-35-1520, Competitive Sealed Bidding, Section 11-35-1525, Competitive Fixed Price Bidding, or Section 11-35-1528, Competitive Best Value Bidding; or

(3) soliciting proposals in accordance with Section 11-35-1530, Competitive Sealed Proposals.

D. When conducting a small purchase over twenty-five thousand dollars for which adequate public notice is required, potential offerors must be provided reasonable time to prepare their bids, no less than seven (7) days after such notice is provided, unless a shorter time is deemed necessary for a particular procurement as determined in writing by the head of the purchasing agency, the appropriate chief procurement officer, or the designee of either.

##### E. Establishment of Blanket Purchase Agreements.

(1) General. A blanket purchase agreement is a simplified method of filling repetitive needs for small quantities of miscellaneous supplies, services, or information technology by establishing "charge accounts" with qualified sources of supply. Blanket purchase agreements are designed to reduce administrative costs in accomplishing small purchases by eliminating the need for issuing individual purchase documents.

(2) Alternate Sources. To the extent practicable, blanket purchase agreements for items of the same type should be placed concurrently with more than one supplier. All competitive sources shall be given an equal opportunity to furnish supplies, services, or information technology under such agreements.

(3) Terms and Conditions. Blanket purchase agreements shall contain the following provisions:

(a) Description of agreement. A statement that the supplier shall furnish supplies, services, or information technology, described therein in general terms, if and when requested by the Procurement Officer, or his authorized representative, during a specified period and within a stipulated aggregate amount, if any. Blanket purchase agreements may encompass all items that the supplier is in a position to furnish.

(b) Extent of obligation. A statement that the State is obligated only to the extent of authorized calls actually placed against the blanket purchase agreement.

(c) Notice of individuals authorized to place calls and dollar limitations. A provision that a list of names of individuals authorized to place calls under the agreement, identified by organizational component, and the dollar limitation per call for each individual shall be furnished to the supplier by the Procurement Officer.

(d) Delivery tickets. A requirement that all shipments under the agreement, except subscriptions and other charges for newspapers, magazines, or other periodicals, shall be accompanied by delivery tickets or sales slips which shall contain the following minimum information:

(1) name of supplier;

(2) blanket purchase agreement number;

(3) date of call;

(4) call number;

(5) itemized list of supplies, services, or information technology furnished;

(6) quantity, unit price, and extension of each item less applicable discounts (unit price and extensions need not be shown when incompatible with the use of automated systems, provided that the invoice is itemized to show this information); and

(7) date of delivery or shipment.

(e) Invoices one of the following statements:

(1) A summary invoice shall be submitted at least monthly or upon expiration of the blanket purchase agreement, whichever occurs first, for all deliveries made during a billing period, identifying the delivery tickets covered therein, stating their total dollar value, and supported by receipted copies of the delivery tickets; or

(2) An itemized invoice shall be submitted at least monthly or upon expiration of the blanket purchase agreement, whichever occurs first, for all deliveries made during a billing period and for which payment has not been received. Such invoices need not be supported by copies of delivery tickets;

(3) When billing procedures provide for an individual invoice for each delivery, these invoices shall be accumulated provided that a consolidated payment will be made for each specified period; and the period of any discounts will commence on final date of billing period or on the date of receipt of invoices for all deliveries accepted during the billing period, whichever is later. This procedure should not be used if the accumulation of the individual invoices materially increases the administrative costs of this purchase method.

F. Competition Under Blanket Purchase Agreement.

Calls against blanket purchase agreements shall be placed after prices are obtained. When concurrent agreements for similar items are in effect, calls shall be equitably distributed. In those instances where there is an insufficient number of BPAs for any given class of supplies, services, or information technology to assure adequate competition, the individual placing the order shall solicit quotations from other sources.

G. Calls Against Blanket Purchase Agreement.

Calls against blanket purchase agreements generally will be made orally, except that informal correspondence may be used when ordering against agreements outside the local trade area. Written calls may be executed. Documentation of calls shall be limited to essential information. Forms may be developed for this purpose locally and be compatible with the Comptroller General's Office STARS system.

H. Receipt and Acceptance of Supplies or Services.

Acceptance of supplies, services, or information technology shall be indicated by signature and date on the appropriate form by the authorized State representative after verification and notation of any exceptions.

I. Review Procedures.

The governmental body shall review blanket purchase agreement files at least semiannually to assure that authorized procedures are being followed. Blanket purchase agreements shall be issued for a period of no longer than 12 months.

19-445.2105. Sole Source Procurements.

A. Application.

The provisions of this Regulation shall apply to all sole source procurements unless emergency conditions exist as defined in Regulation 19-445.2110.

B. Exceptions.

Sole source procurement is not permissible unless there is only a single supplier. The following are examples of circumstances which could necessitate sole source procurement:

- (1) where the compatibility of equipment, accessories, or replacement parts is the paramount consideration;
- (2) where a sole supplier's item is needed for trial use or testing;
- (3) [Repealed]
- (4) [Repealed]
- (5) where the item is one of a kind; and
- (6) [Repealed]

C. Written Determination.

~~(1) The written determination as to whether a procurement shall be made to conduct a procurement as a sole source shall be made by either the Chief Procurement Officer, the head of a purchasing agency, or designee of either office above the level of the procurement officer. Any delegation of authority by either the Chief Procurement Officer or the head of a purchasing agency with respect to sole source determinations shall be submitted in writing to the Materials Management Officer. Such determination and the basis therefor shall be in writing. Such officer may specify the application of such determination and the duration of its effectiveness. (2) The written determination must include a purchase description that states the using agency's actual needs, which shall not be unduly restrictive. In cases of reasonable doubt, competition should be solicited. Any request by a governmental body that a procurement be restricted to one potential contractor shall be accompanied by an explanation as to why no other will be suitable or acceptable to meet the need. The determination must contain sufficient factual grounds and reasoning to provide an informed, objective explanation for the decision and must be accompanied by market research that supports the decision. The determination must be authorized prior to contract execution.~~

D. Notice.

- (1) Compliance with the notice requirements in Section 11-35-1560(A) must be documented in the procurement file.
- (2) The public notice required by Section 11-35-1560(A) must include the written determination required by Section C(2) above or instructions how to obtain the written determination immediately upon request.

E. Other Applicable Provisions.

Sole source procurements must comply with all applicable statutes and regulations, including without limitation, Sections 11-35-30 (Obligation of good faith), -210 (Determinations), -410 (Public access to procurement information), -1810 (Responsibility of bidders and offerors), -1830 (Cost or pricing data), -2010 (Types of contracts), -2030 (Multiterm contracts), -1610 (Change order or contract modification), -2440 (Records of procurement actions), -2730 (Assuring competition), and -4230 (Authority to resolve contract and breach of contract controversies).

19-445.2110. Emergency Procurements.

A. Application.

The provisions of this Regulation apply to every procurement made under emergency conditions that will not permit other source selection methods to be used.

B. Definition.

An emergency condition is a situation which creates a threat to public health, welfare, or safety such as may arise by reason of floods, epidemics, riots, equipment failures, fire loss, or such other reason as may be proclaimed by either the Chief Procurement Officer or the head of a purchasing agency or a designee of either office. The existence of such conditions must create an immediate and serious need for supplies, services, information technology, or construction that cannot be met through normal procurement methods and the lack of which would seriously threaten:

- (1) the functioning of State government;
- (2) the preservation or protection of property; or
- (3) the health or safety of any person.

C. Limitations.

Emergency procurement shall be limited to those supplies, services, information technology, or construction items necessary to meet the emergency.

D. Conditions.

Any governmental body may make emergency procurements when an emergency condition arises and the need cannot be met through normal procurement methods, provided that whenever practical, approval by either the head of a purchasing agency or his designee or the Chief Procurement Officer shall be obtained prior to the procurement.

E. Selection of Method of Procurement.

The procedure used shall be selected to assure that the required supplies, services, information technology, or construction items are procured in time to meet the emergency. Given this constraint, such competition as is practicable shall be obtained.

F. Notice.

Compliance with the notice requirements in Section 11-35-1570(B) must be documented in the procurement file.

G. Written Determination.

The Chief Procurement Officer or the head of the purchasing agency or a designee of either office shall make a written determination stating the basis for an emergency procurement and for the selection of the particular contractor. The determination must contain sufficient factual grounds and reasoning to provide an informed, objective explanation for the decision.

19-445.2115. Information Technology Procurements.

A. Reserved.

B. Reserved.

C. Software Licensing

Pursuant to Section 11-35-510, the Information Technology Management Officer may execute an agreement with a business on behalf of, and which binds all, governmental bodies in order to establish the terms and conditions upon which computer software may be licensed, directly or indirectly, from that business by a governmental body. Such an agreement may provide for the voluntary participation of any other South Carolina public procurement unit. Such agreements do not excuse any governmental body from complying with any applicable requirements of the Procurement Code and these Regulations, including the requirements of Section 11-35-1510.

19-445.2120. Cost or Pricing Data.

A. Definitions

(1) Adequate Price Competition. Price competition exists if competitive sealed proposals are solicited, at least two responsive and responsible offerors independently compete for a contract, and price is a substantial factor in the evaluation. If the foregoing conditions are met, price competition shall be

presumed to be “adequate” unless the procurement officer determines in writing that such competition is not adequate.

(2) Commercial product has the meaning stated in Section 11-35-1410(1).

(3) Established catalog price has the meaning stated in Section 11-35-1410.

(4) Established Market Price means a current price, established in the usual and ordinary course of trade between buyers and sellers, which can be substantiated from sources which are independent of the manufacturer or supplier and may be an indication of the reasonableness of price.

(5) Prices Set by Law or Regulation. The price of a supply or service is set by law or regulation if some governmental body establishes the price that the offeror or contractor may charge the State and other customers.

#### B. Thresholds

(1) Section 11-35-1830(1)(a) applies where the total contract price exceeds five hundred thousand dollars.

(2) Section 11-35-1830(1)(b) applies where the pricing of any change order, contract modification, or termination settlement exceeds five hundred thousand dollars, unless the procurement officer determines in writing that such information is necessary to determine that the pricing is reasonable. Price adjustment amounts shall consider both increases and decreases (e.g., a \$150,000 modification resulting from a reduction of \$350,000 and an increase of \$200,000 is a pricing adjustment exceeding \$500,000.). This requirement does not apply when unrelated and separately priced changes for which cost or pricing data would not otherwise be required are included for administrative convenience in the same modification.

(3) Ordinarily, cost and pricing data should not be required for the acquisition of any item that meets the definition of commercial product, including any modification that does not change the item from a commercial product to a non-commercial product. The contractor may be required to submit cost or pricing data for commercial products or COTS only if the purchase or modification exceeds the thresholds established in this section and the procurement officer determines in writing that no other basis exists to establish price reasonableness.

#### C. Conditions of Waiver

The requirements of Section 11-35-1830 may be waived if the head of the using agency determines in writing that the price can be determined to be fair and reasonable without submission of cost or pricing data.

#### D. Refusal to Submit Data

A refusal by the offeror to supply the requested information may be grounds to disqualify the offeror or to defer award pending further review and analysis.

#### 19-445.2122. Price Reasonableness.

A. General. The objective of offer analysis is to ensure that the final contract price is fair and reasonable. The procurement officer is responsible for evaluating the reasonableness of the offered prices. Normally, competition establishes price reasonableness. Therefore, when contracting on a firm-fixed-price basis, comparison of the proposed prices will usually satisfy the requirement to perform a price analysis, and a cost analysis need not be performed. In limited situations, a cost analysis (see subsection B(2)) may be appropriate to establish reasonableness of the otherwise successful offeror’s price. The analytical techniques and procedures described in this regulation may be used, singly or in combination with others, to ensure that the final price is fair and reasonable. In addition, they should be used to analyze cost or pricing data required by Section 11-35-1830. The complexity and circumstances of each acquisition should determine the appropriate level of detail for the analysis. The appropriate Chief Procurement Officer may develop and issue procedures which shall be followed by all agencies conducting offer analysis. The responsible procurement officer may request the advice and assistance of other experts to ensure that an appropriate analysis is performed.

B. Analytical techniques include, but are not limited to, the following:

(1) Price analysis is the process of examining and evaluating a proposed price without evaluating its separate cost elements and proposed profit. Examples of price analysis criteria include but are not limited to: (a) price submissions of prospective bidders or offerors in the current procurement; (b) prior price

quotations and contract prices charged by the bidder, offeror, or contractor; (c) prices published in catalogues or price lists; (d) prices available on the open market; and (e) in-house estimates of cost. The responsible procurement officer may use various price analysis techniques and procedures to ensure a fair and reasonable price.

(2) Cost analysis is the review and evaluation of any separate cost elements and profit or fee in an offeror's or contractor's proposal, as needed to determine a fair and reasonable price, and the application of judgment to determine how well the proposed costs represent what the cost of the contract should be, assuming reasonable economy and efficiency. Cost analysis includes the appropriate verification of cost or pricing data, and the use of this data to evaluate: (a) specific elements of costs; (b) the necessity for certain costs; (c) the reasonableness of amounts estimated for the necessary costs; (d) the reasonableness of allowances for contingencies; (e) the basis used for allocation of indirect costs; (f) the appropriateness of allocations of particular indirect costs to the proposed contract; and (g) the reasonableness of the total cost or price. The responsible procurement officer may use various cost analysis techniques and procedures to ensure a fair and reasonable price, given the circumstances of the acquisition.

C. Unbalanced pricing. All offers with separately priced line items or subline items shall be analyzed to determine if the prices are unbalanced. Unbalanced pricing exists when, despite an acceptable total evaluated price, the price of one or more line items is significantly over or understated as indicated by the application of cost or price analysis techniques. If the responsible procurement officer determines that unbalanced pricing may increase performance risk (e.g., it is so unbalanced as to be tantamount to allowing an advance payment) or could result in payment of unreasonably high prices, she may conclude that the offer is unreasonable as to price.

#### 19-445.2125. Responsibility of Bidders and Offerors.

##### A. State Standards of Responsibility.

Factors to be considered in determining whether the state standards of responsibility have been met include whether a prospective contractor has:

- (1) available the appropriate financial, material, equipment, facility, and personnel resources and expertise, or the ability to obtain them, necessary to indicate its capability to meet all contractual requirements;
- (2) a satisfactory record of performance;
- (3) a satisfactory record of integrity;
- (4) qualified legally to contract with the State; and
- (5) supplied all necessary information in connection with the inquiry concerning responsibility.

##### B. Obtaining Information; Duty of Contractor to Supply Information.

At any time prior to award, the prospective contractor shall supply information requested by the procurement officer concerning the responsibility of such contractor. If such contractor fails to supply the requested information, the procurement officer shall base the determination of responsibility upon any available information or may find the prospective contractor non responsible if such failure is unreasonable. In determining responsibility, the procurement officer may obtain and rely on any sources of information, including but not limited to the prospective contractor; knowledge of personnel within the using or purchasing agency; commercial sources of supplier information; suppliers, subcontractors, and customers of the prospective contractor; financial institutions; government agencies; and business and trade associations.

##### C. Demonstration of Responsibility.

The prospective contractor may demonstrate the availability of necessary financing, equipment, facilities, expertise, and personnel by submitting upon request:

- (1) evidence that such contractor possesses such necessary items;
- (2) acceptable plans to subcontract for such necessary items; or
- (3) a documented commitment from, or explicit arrangement with, a satisfactory source to provide the necessary items.

##### D. Duty Concerning Responsibility.

(1) Before awarding a contract or issuing a notification of intent to award, whichever is earlier, the procurement officer must be satisfied that the prospective contractor is responsible. The determination is not limited to circumstances existing at the time of opening.

(2) Consistent with Section 11-35-1529(3), the procurement officer must determine responsibility of bidders in competitive on-line bidding before bidding begins.

E. Written Determination of Nonresponsibility.

If a bidder or offeror who otherwise would have been awarded a contract is found nonresponsible, a written determination of nonresponsibility setting forth the basis of the finding shall be prepared by the procurement officer. A copy of the determination shall be sent promptly to the nonresponsible bidder or offeror. The final determination shall be made part of the procurement file.

F. Special Standards of Responsibility

When it is necessary for a particular acquisition or class of acquisitions, the procurement officer may develop, with the assistance of appropriate specialists, special standards of responsibility. Special standards may be particularly desirable when experience has demonstrated that unusual expertise or specialized facilities are needed for adequate contract performance. The special standards shall be set forth in the solicitation (and so identified) and shall apply to all offerors. A valid special standard of responsibility must be specific, objective and mandatory.

G. Subcontractor responsibility.

(1) Generally, prospective prime contractors are responsible for determining the responsibility of their prospective subcontractors. Determinations of prospective subcontractor responsibility may affect the procurement officer's determination of the prospective prime contractor's responsibility. A prospective contractor may be required to provide written evidence of a proposed subcontractor's responsibility.

(2) When it is in the state's interest to do so, the procurement officer may directly determine a prospective subcontractor's responsibility (e.g., when the prospective contract involves medical supplies, urgent requirements, or substantial subcontracting). In this case, the same standards used to determine a prime contractor's responsibility shall be used by the procurement officer to determine subcontractor responsibility.

19-445.2127. Organizational Conflicts of Interest.

A. General.

(1) "Organizational conflict of interest" occurs when, because of other activities or relationships with the State or with other businesses:

- (a) a business is unable or potentially unable to render impartial assistance or advice to the State, or
- (b) the business' objectivity in performing the contract work is or might be otherwise impaired, or
- (c) a business has an unfair competitive advantage.

(2) This regulation applies to acquisitions of supplies, services and information technology, except for acquisitions made pursuant to Section 11-35-1550. Unless the procurement uses a project delivery method identified in Section 11-35-3005(1)(e), 1(f), or (2)(a), this regulation does not apply to acquisitions under Article 9 (Construction, Architect-Engineer, Construction Management, and Land Surveying Services).

(3) The general rules in sections B (Providing systems engineering and technical direction), C (Preparing specifications or work statements), and D (Providing evaluation of offers) below prescribe limitations on contracting as the means of avoiding organizational conflicts of interest that might otherwise exist in the stated situations. Conflicts may arise in situations not expressly covered in sections B, C, and D. Each individual contracting situation should be examined on the basis of its particular facts and the nature of the proposed contract. The exercise of common sense, good judgment, and sound discretion is required in both the decision on whether a significant potential conflict exists and, if it does, the development of an appropriate means for resolving it. The two underlying principles are

- (a) Preventing the existence of conflicting roles that might bias a contractor's judgment; and
- (b) Preventing unfair competitive advantage. Without limitation, an unfair competitive advantage exists where a business competing for award of a State contract possesses (i) proprietary information that was obtained from the State without authorization; or (ii) source selection information (R.19-445.2010C) that

is relevant to the contract but is not available to all competitors, and such information would assist that business in obtaining the contract.

(4) The terms “contractor” and “subcontractor” are defined by Section 11-35-310.

B. Providing systems engineering and technical direction. (1) A business shall not be awarded a contract to supply a system or any of its major components, or be a subcontractor or consultant, if that business, as a contractor, provided or provides a combination of substantially all of the following activities:

- (a) determining specifications or developing work statements,
- (b) determining parameters,
- (c) identifying and resolving interface problems,
- (d) developing test requirements,
- (e) evaluating test data,
- (f) supervising design,
- (g) directing other contractors’ operations, and
- (h) resolving technical controversies.

(2) This section B does not prohibit a contractor providing systems engineering and technical direction, from developing or producing a system if the entire effort is conducted under a single contract.

C. Preparing specifications or work statements.

(1) If a contractor prepares and furnishes specifications for a specific acquisition of tangible supplies or information resources, or their components, that contractor shall not be allowed to furnish these items, either as a contractor or as a subcontractor at any tier, for a reasonable period of time including, at least, the duration of the initial contract for purchase of the items.

(2) If a contractor prepares, or assists in preparing, a work statement to be used in a specific acquisition of a system or services—or provides material leading directly, predictably, and without delay to such a work statement—that contractor may not supply the system, major components of the system, or the services, either as a contractor or as a subcontractor at any tier, unless (a) the acquisition is a sole source under R.19-445.2105; (b) it has participated in the development and design work; or (c) more than one contractor has been involved in preparing the work statement.

D. Providing evaluation of offers. If a contractor evaluates or supports the evaluation of a bid or proposal for a contract with a governmental body, that contractor and its affiliates are barred from performing under that contract as either a contractor or as a subcontractor at any tier.

E. Procurement Officer Responsibilities.

(1) The responsible procurement officer shall (a) analyze planned acquisitions in order to identify and evaluate potential organizational conflicts of interest as early in the acquisition process as possible; and (b) review plans to avoid, neutralize, or mitigate significant potential conflicts before contract award.

(2) The responsible procurement officer shall determine whether the apparent successful offeror has an organizational conflict of interest. The responsible procurement officer shall award the contract to the apparent successful offeror unless (i) a conflict of interest is determined to exist that cannot be avoided or mitigated, or (ii) the conflict is not waived as provided in section F. Before determining to withhold award based on conflict of interest considerations, the procurement officer shall notify the contractor, provide the reasons therefor, and allow the contractor a reasonable opportunity to respond.

F. Waiver. With respect to the award of an individual contract, the using agency may waive an organizational conflict of interest by determining that the application of these rules in a particular situation would not be in the State’s interest. A determination to waive a conflict of interest must be in writing, shall set forth the extent of the conflict, and requires approval by the agency head or her designee above the level of the agency’s senior procurement official. If a waiver involves an acquisition with a value that exceeds either the limits of the governmental body’s authority under Section 11-35-1210(1) or one million dollars, the appropriate Chief Procurement Officer must concur in the waiver and the written determination must be published with the notice of intent to award. Any report required by R.19-445.2020A(2) must include every waiver addressing a procurement during the audit period.

G. The appropriate Chief Procurement Officer may develop and issue procedures which shall be followed by all agencies to identify organizational conflicts of interest and techniques to avoid or mitigate them.

19-445.2130. Prequalification of Supplies and Suppliers.

A. Qualified Products Lists.

A qualified products list may be developed with the approval of the Chief Procurement Officer or the procurement officer of the governmental body authorized to develop qualified products lists, when testing or examination of the supplies or construction items prior to issuance of the solicitation is desirable or necessary in order to best satisfy state requirements. The procedures for the inclusion of a product on the qualified products list (“QPL”) must be available to prospective vendors for consideration of their product to the list.

B. Prospective suppliers may be prequalified, and distribution of the solicitation may be limited to prequalified suppliers. Suppliers who meet the prequalification standards at any time shall be added to the prequalified list for subsequent solicitations. The fact that a prospective supplier has been prequalified does not necessarily represent a finding of responsibility.

19-445.2132. Prequalification for a Single Solicitation.

A. Application.

The pre-qualification process shall not be used to unduly limit competition. Any mandatory minimum requirements shall comply with Section 11-35-2730. In a competitive bid, the pre-qualification process is not intended to eliminate bidders capable of completing the work being procured. Before a request for qualifications may be issued pursuant to Section 11-35-1520(11) or 11-35-1530(4), the chief procurement officer or the head of a purchasing agency or either officer’s designee shall prepare a written justification stating the necessity for pre-qualifying offerors. Prior to issuance of the solicitation, each potential offeror seeking qualification must be promptly informed as to whether qualification is attained and, in the event qualification is not attained, is promptly furnished specific information why qualification was not attained.

B. Receipt and Safeguarding of Responses.

Prior to opening submittals received in response to a request for prequalification, the provisions of Regulation 19-445.2045 shall apply to the receipt and safeguarding of all such submittals received.

19-445.2135. Conditions for Use of Multi-term Contracts.

A. General.

A multi-term contract is a contract for the acquisition of supplies, services, or information technology for more than one year. A contract is not a multi-term contract if no single term exceeds one year and each term beyond the first requires the governmental body to exercise an option to extend or renew. A multi-term contract is appropriate when it is in the best interest of the State to obtain uninterrupted services for a period in excess of one year, where the performance of such services involves high start up costs, or when a changeover of service contracts involves high phase in/phase out costs during a transition period. The multi-term method of contracting is also appropriate when special production of definite quantities of supplies for more than one year is necessary to best meet state needs but funds are available only for the initial fiscal period. Special production refers to production for contract performance when it requires alteration in the contractor’s facilities or operations involving high start up costs.

B. Objective.

The objective of the multi-term contract is to promote economy and efficiency in procurement by obtaining the benefits of sustained volume production and consequent low prices, and by increasing competitive participation in procurements which involve special production with consequent high start-up costs and in the procurement of services which involve high start-up costs or high phase-in/phase-out costs during changeover of service contracts.

C. Exceptions.

This Regulation 19-445.2135 applies only to contracts for supplies, services, or information technology and does not apply to contracts for construction.

D. Conditions for Use.

(1) A multi-term contract may be used if, prior to issuance of the solicitation, the Procurement Officer determines in writing that:

(a) Special production of definite quantities or the furnishing of long term services are required to meet state needs; or

(b) a multi-term contract will serve the best interests of the state by encouraging effective competition or otherwise promoting economies in state procurement.

(2) The following factors are among those relevant to such a determination:

(a) firms which are not willing or able to compete because of high start up costs or capital investment in facility expansion will be encouraged to participate in the competition when they are assured of recouping such costs during the period of contract performance;

(b) lower production cost because of larger quantity or service requirements, and substantial continuity of production or performance over a longer period of time, can be expected to result in lower unit prices;

(c) stabilization of the contractor's work force over a longer period of time may promote economy and consistent quality;

(d) the cost and burden of contract solicitation, award, and administration of the procurement may be reduced.

(3) The determination must contain sufficient factual grounds and reasoning to provide an informed, objective explanation for the decision.

#### E. Solicitation.

The solicitation shall state:

(1) the estimated amount of supplies or services required for the proposed contract period;

(2) that a unit price shall be given for each supply or service, and that such unit prices shall be the same throughout the contract (except to the extent price adjustments may be provided in the solicitation and resulting contract);

(3) that the multi-term contract will be cancelled only if funds are not appropriated or otherwise made available to support continuation of performance in any fiscal period succeeding the first; however, this does not affect either the state's rights or the contractor's rights under any termination clause in the contract;

(4) that the procurement officer of the governmental body must notify the contractor on a timely basis that the funds are, or are not, available for the continuation of the contract for each succeeding fiscal period;

(5) whether bidders or offerors may submit prices for:

(a) the first fiscal period only;

(b) the entire time of performance only; or

(c) both the first fiscal period and the entire time of performance;

(6) that a multi-term contract may be awarded and how award will be determined including, if prices for the first fiscal period and entire time of performance are submitted, how such prices will be compared; and,

(7) that, in the event of cancellation as provided in (E) (3) of this subsection, the contractor will be reimbursed the unamortized, reasonably incurred, nonrecurring costs.

#### F. Award.

Award shall be made as stated in the solicitation and permitted under the source selection method utilized. Care should be taken when evaluating multi-term prices against prices for the first fiscal period that award on the basis of prices for the first period does not permit the successful bidder or offeror to "buy in", that is give such bidder or offeror an undue competitive advantage in subsequent procurements.

#### G. Maximum Contract Periods

Every contract with a total potential duration in excess of five years must be approved as required by Section 11-35-2030(4) or Section 11-35-2030(5). No solicitation shall be issued for a contract with a total potential duration in excess of five years, nor shall any contract with a total potential duration in excess of five years be awarded pursuant to Section 11-35-1560, until such approval is granted.

19-445.2137. Food Service Contracts.

Any food service contracts entered into by any governmental body shall be solicited by the Materials Management Office under Code Section 11-35-1530, Competitive Sealed Proposals, and Regulation 19-445.2095. A review panel composed of one representative each from the governmental body, the Materials Management Office, and the Commission on Higher Education shall review such proposals and approve it prior to the issuance of an award or notification of intent to award, whichever is earlier.

19-445.2140. Specifications.

A. Definitions.

(1) “Brand Name Specification” means a specification limited to one or more items by manufacturers’ names or catalogue number.

(2) “Brand Name or Equal Specification” means a specification which uses one or more manufacturer’s names or catalogue numbers to describe the standard of quality, performance, and other characteristics needed to meet state requirements, and which provides for the submission of equivalent products.

(3) “Qualified Products List” means an approved list of supplies, services, information technology, or construction items described by model or catalogue number, which, prior to competitive solicitation, the State has determined will meet the applicable specification requirements.

(4) “Specification” means any description of the physical, functional, or performance characteristics, or of the nature of a supply, service, information technology, or construction item. A specification includes, as appropriate, requirements for inspecting, testing, or preparing a supply, service or construction item for delivery. Unless the context requires otherwise, the terms “specification” and “purchase description” are used interchangeably throughout the Regulations.

(5) “Specification for a Common or General Use Item” means a specification which has been developed and approved for repeated use in procurements.

B. Issuance of Specifications.

The purpose of a specification is to serve as a basis for obtaining a supply, service, information technology, or construction item adequate and suitable for the State’s needs in a cost effective manner, taking into account, to the extent practicable, the cost of ownership and operation as well as initial acquisition costs. It is the policy of the State that specifications permit maximum practicable competition consistent with this purpose. Specification shall be drafted with the objective of clearly describing the State’s requirements. All specifications shall be written in a non restrictive manner as to describe the requirements to be met.

C. Use of Functional or Performance Descriptions.

(1) Specifications shall, to the extent practicable, emphasize functional or performance criteria while limiting design or other detailed physical descriptions to those necessary to meet the needs of the State. To facilitate the use of such criteria, using agencies shall endeavor to include as a part of their purchase requisitions the principal functional or performance needs to be met. It is recognized, however, that the preference for use of functional or performance specifications is primarily applicable to the procurement of supplies, services, and information technology. Such preference is often not practicable in construction, apart from the procurement of supply type items for a construction project.

(2) Brand Name or Equal Specifications.

(a) Brand name or equal specifications shall include a description of the particular design, functional, or performance characteristics which are required.

(b) Where a brand name or equal specification is used in a solicitation, the solicitation shall contain explanatory language that the use of a brand name is for the purpose of describing the standard of quality, performance, and characteristics desired and is not intended to limit or restrict competition.

D. Preference for Commercially Available Products.

It is the general policy of this State to procure standard commercial products whenever practicable. In developing specifications, accepted commercial standards shall be used and unique requirements shall be avoided, to the extent practicable.

E. [Repealed]

F. [Repealed]

19-445.2141. Commercial Products.

A. Definitions.

(1) Commercial product has the meaning stated in Section 11-35-1410, and does not include printing or insurance.

(2) Commercially available off-the-shelf product (“COTS”) has the meaning stated in Section 11-35-1410, and does not include printing or insurance.

B. General.

(1) Agencies shall conduct market research to determine whether commercial products or COTS are available that could meet agency requirements, and should endeavor to acquire commercial products or COTS when they are available to meet agency needs (see R.19-445.2140D (Preference for commercially available products)).

(2) Consistent with Section 11-35-1535(A)(2), the competitive negotiations source selection method may not be used to acquire only commercially available off-the-shelf products.

C. Price reasonableness.

(1) An advantage of COTS is that a competitive market, evidenced by substantial commercial sales, helps to determine price reasonableness. Substantial sales of a COTS product may establish catalog prices (see Section 11-35-1410) and market prices. Market prices are current prices that are established in the usual and ordinary course of trade between buyers and sellers (see R.19-445.2120A(3)). A characteristic of both catalog prices and market prices is that they can be substantiated from sources independent of the offeror—for example, through market research.

(2) “Items customarily sold in bulk” means products that are loaded and carried in bulk without mark or count. COTS does not include bulk materials, like fuel and grain, because the prices for those items fluctuate, making it difficult or impossible to rely on short-term pricing to establish price reasonableness for purchase contracts that may be for a longer term.

D. Purchase description or specification.

The agency’s purchase description must contain sufficient detail for potential offerors of commercial products or COTS to know which products may be suitable. Generally, an agency’s specification for COTS should describe the type of product to be acquired and explain how the agency intends to use the product in terms of function to be performed, performance requirement or physical characteristics.

Describing the agency’s needs in these terms allows offerors to propose products that will best meet the State’s needs.

E. Simplified purchasing procedures for COTS.

(1) Section 11-35-1550(2)(b) authorizes the use of simplified procedures for the acquisition of supplies and information resources in amounts up to \$100,000, if the responsible procurement officer reasonably expects, based on the nature of the supplies or information resources sought, and on market research, that offers will include only COTS. The purpose of these simplified procedures is to vest procurement officers with additional procedural discretion and flexibility, so that COTS acquisitions in this dollar range may be solicited, offered, evaluated, and awarded in a simplified manner that maximizes efficiency and economy and minimizes burden and administrative costs for both the State and industry (see R.19-445.2100).

(2) The procurement officer should be aware of customary commercial terms and conditions when pricing COTS. COTS prices are affected by factors that include, but are not limited to, speed of delivery, length and extent of warranty, limitations of seller’s liability, quantities ordered, length of the performance period, and specific performance requirements. The procurement officer should review the using agency’s standard contract terms and conditions, along with commercial terms appropriate for the acquisition of the particular item. The procurement officer should consider avoiding terms inconsistent with commercial practice, unless those terms are required by law (see R.19-445.2143) or are essential to the using agency’s requirements.

(3) Section 11-35-2040 provides that COTS purchases made using any of the simplified procedures of Section 11-35-1550 are exempt from a number of statutory provisions that vendors have complained are

overly burdensome. The procurement officer should consider Section 11-35-2040 and R.19-445.2143 when preparing the solicitation or written request for quotes.

(4) Regulation 19-445.2120B(3) prohibits requiring cost or pricing data when acquiring a commercial product, including COTS, unless the purchase or modification exceeds the thresholds established in that section and the procurement officer determines in writing that no other basis exists to establish price reasonableness.

F. The appropriate Chief Procurement Officer may develop and issue guidance, including solicitation forms, which may be used by agencies acquiring COTS using small purchase procedures.

19-445.2143. Contract clauses and administration.

A. Contracts formed pursuant to the Consolidated Procurement Code are deemed to incorporate all applicable provisions thereof and the ensuing regulations.

B. Prohibited Terms. Unless otherwise specifically provided by or authorized by law, if a contract contains any of the following terms, the term shall be void, and the contract is otherwise enforceable as if it did not contain such term or condition:

(1) Terms (a) subjecting the State of South Carolina or its agencies to the jurisdiction of the courts of other states; or (b) requiring the State of South Carolina or its agencies to bring or defend a legal claim in a venue outside this State. (Sections 11-35-2050 and -4230)

(2) Terms limiting the time in which the State of South Carolina or its agencies may bring a legal claim under the contract to a period shorter than that provided in South Carolina law. (Sections 11-35-4230(2) and 15-3-140)

(3) Terms imposing a payment obligation, including a rate of interest for late payments, inconsistent with the terms of Section 11-35-45.

(4) Terms that require the State to defend, indemnify, or hold harmless another person. (Section 11-35-2050)

(5) Terms requiring that the contract be governed or interpreted by other than South Carolina law. (Section 11-35-2050)

C. A material change is a change order or contract modification that is beyond the general scope of the original contract, such that the subject of the modification should be competitively procured absent a valid sole-source justification. Material changes are inconsistent with the underlying purposes and policies of this code. The appropriate Chief Procurement Officer may develop and issue guidance and procedures for evaluating whether a change order or modification is material.

19-445.2145. Construction, Architect Engineer, Construction Management, and Land Surveying Services.

A. Definitions

(1) Designer, as used in these regulations, means a person who has been awarded, through the qualifications-based process set forth in Section 11-35-3220, a contract with the State for the design of any infrastructure facility using the design-bid-build project delivery method defined in Section 11-35-2910(6).

(2) Builder, as used in these regulations, means a person who has been awarded, through competitive sealed bidding, a separate contract with the State to construct (alter, repair, improve, or demolish) any infrastructure facility using the design-bid-build project delivery method defined in Section 11-35-2910(6).

(3) Design-Builder, as used in these regulations, means a person who has been awarded a contract with the State for the design and construction of any infrastructure facility using the design-build project delivery method defined in Section 11-35-2910(7).

(4) DBO Producer, as used in these regulations, means a person who has been awarded a contract with the State for the design, construction, operation, and maintenance of any infrastructure facility using the design-build-operate-maintain project delivery method defined in Section 11-35-2910(9).

(5) DBFO Producer, as used in these regulations, means a person who has been awarded a contract with the State for the design, construction, finance, operation, and maintenance of any infrastructure facility

using the design-build-finance-operate-maintain project delivery method defined in Section 11-35-2910(8).

(6) Guaranteed Maximum Price (GMP) means a price for all costs for the construction and completion of the project, or designated portion thereof, including all construction management services and all mobilization, general conditions, profit and overhead costs of any nature, and where the total contract amount, including the contractor's fee and general conditions, will not exceed a guaranteed maximum amount.

(7) Independent Peer Reviewer means a person who has been awarded a contract with the State for an independent, contemporaneous, peer review of the design services provided to the State by a DBO or DBFO Producer. In the event the State does not elect to contract with the Independent Peer Reviewer proposed by the successful DBO or DBFO Producer, the Independent Peer Reviewer shall be selected as provided in Section 11-35-2910(11).

(8) Operator, as used in these regulations, means a person who has been awarded, through competitive sealed bidding, a separate contract with the State for the routine operation, routine repair, and routine maintenance (Operation and Maintenance) of any infrastructure facility, as defined in Section 11-35-2910(13).

#### B. Choice of Project Delivery Method.

(1) This Subsection contains provisions applicable to the selection of the appropriate project delivery method for constructing infrastructure facilities, that is, the method of configuring and administering construction projects which is most advantageous to the State and will result in the most timely, economical, and otherwise successful completion of the infrastructure facility. The governmental body shall have sufficient flexibility in formulating the project delivery approach on a particular project to fulfill the State's needs. Before choosing the project delivery method, a careful assessment must be made of requirements the project must satisfy and those other characteristics that would be in the best interest of the State.

#### (2) Selecting An Appropriate Project Delivery Method.

In selecting an appropriate project delivery method for each of the State's Infrastructure Facilities, the governmental body should consider the results achieved on similar projects in the past and the methods used. Consideration should be given to all authorized project delivery methods, the comparative advantages and disadvantages of each, and how these methods may be appropriately configured and applied to fulfill State requirements. Additional factors to consider include:

(a) the extent to which the governmental body's design requirements for the Infrastructure Facility are known, stable, and established in writing;

(b) the extent to which qualified and experienced State personnel are available to the governmental body to provide the decision-making and administrative services required by the project delivery method selected;

(c) the extent to which decision-making and administrative services may be appropriately assigned to designers, builders, construction-managers at-risk, design-builders, DBO producers, DBFO producers, peer reviewers, or operators, as appropriate to the project delivery method;

(d) the extent to which outside consultants, including construction manager agent, may be able to assist the governmental body with decision-making and administrative contributions required by the project delivery method;

(e) the governmental body's projected cash flow for the Infrastructure Facility to be acquired (both sources and uses of the funds necessary to support design, construction, operations, maintenance, repairs, and demolition over the facility life cycle);

(f) the type of infrastructure facility or service to be acquired - for example, public buildings, schools, water distribution, wastewater collection, highway, bridge, or specialty structure, together with possible sources of funding for the infrastructure facility - for example, state or federal grants, state or federal loans, local tax appropriations, special purpose bonds, general obligation bonds, user fees, or tolls;

(g) the required delivery date of the infrastructure facility to be constructed;

(h) the location of the infrastructure facility to be constructed;

(i) the size, scope, complexity, and technological difficulty of the infrastructure facility to be constructed;  
(j) the State's current and projected sources and uses of public funds that are currently generally available (and will be available in the future) to support operation, maintenance, repair, rehabilitation, replacement, and demolition of existing and planned infrastructure facilities;

(k) and, any other factors or considerations specified in the Manual for Planning of Execution of State Permanent Improvements, Part 11, or as otherwise requested by the State Engineer.

(3) Except for guaranteed energy, water, or wastewater savings contracts (Section 48-52-670), design-bid-build (acquired using competitive sealed bidding) is hereby designated as an appropriate project delivery method for any infrastructure facility and may be used by any governmental body without further project specific justification.

(4) Governmental Body Determination.

The head of the governmental body shall make a written determination that must be reviewed by the State Engineer. The determination shall describe the project delivery method (Section 11-35-3005), source selection method (Section 11-35-3015 and 11-35-1510), any additional procurement procedures (11-35-3023 and 11-35-3024(2)(c)), and types of performance security (Sections 11-35-3030 and 11-35-3037) selected and set forth the facts and considerations leading to those selections. This determination shall demonstrate either reliance on paragraph (3) above, or that the considerations identified in paragraphs (1) and (2) above, as well as the requirements and financing of the project, were all considered in making the selection. Any determination to use a project delivery method other than design-bid-build must explain why the use of design-bid-build is not practical or advantageous to the State. Any determination to use any of the additional procedures allowed by Section 11-35-3024(2)(c) must explain why the use of such procedures are in the best interests of the State. Any request to use the prequalification process in a design-bid-build procurement must be in writing and must set forth facts sufficient to support a finding that pre-qualification is appropriate and that the construction involved is unique in nature, over ten million dollars in value, or involves special circumstances.

C. Bonds and Security.

(1) Bid Security. Bid Security required by Section 11-35-3030 shall be a certified cashier's check or a bond, in a form to be specified in the Manual for Planning and Execution of State Permanent Improvements - Part II, provided by a surety company licensed in South Carolina with an "A" minimum rating of performance as stated in the most current publication of "Best Key Rating Guide, Property Liability", which company shows a financial strength rating of at least five (5) times that portion of the contract price that does not include operations, maintenance, and finance. Each bond shall be accompanied by a "Power of Attorney" authorizing the attorney in fact to bind the surety.

(2) Contract Performance and Payment Bonds. Unless waived pursuant to Section 11-35-3030(2)(iii), the contractor shall provide a certified cashier's check in the full amount of the Performance and Payment Bonds or may provide, and pay for the cost of, Performance and Payment Bonds in a form to be specified in the Manual for Planning and Execution of State Permanent Improvements-Part II. Each bond for construction exceeding \$50,000 shall be issued by a Surety Company licensed in South Carolina with an "A" minimum rating of performance as stated in the most current publication of "Best Key Rating Guide, Property Liability", which company shows a financial strength rating of at least five (5) times that portion of the contract price that does not include operations, maintenance, and finance. ~~In the case of construction under \$50,000, the agency may, upon written justification and with the approval of the Office of the State Engineer, allow the use of a "B+" rated bond when bid security is required. Where the agency requires a payment bond for construction of \$50,000 or less, the bond must be issued by a surety meeting the requirements of Section 29-6-270.~~ Each bond shall be accompanied by a "Power of Attorney" authorizing the attorney in fact to bind the surety.

D. Architect Engineer, Construction Management and Land Surveying Services Procurement.

(1) The Advertisement of Project Description

The provisions of Regulation 19-445.2040 shall apply to implement the requirements of Code Section 11-35-3220(2), Advertisement of Project Description.

(2) State Engineer's Office Review.

The Office of State Engineer will provide forms in the Manual for Planning and Execution of State Permanent Improvements Projects-Part II for use by governmental bodies in submitting a contract for approval pursuant to Section 11-35-3220(8) of the Code.

E. Contract Forms.

(1) Pursuant to Section 11-35-2010(2), the following contract forms shall be used as applicable, as amended by the State Engineer, and as provided in the Manual for Planning and Execution of State Permanent Improvements-Part II. Subject to the foregoing:

(a) If an agency conducts a competitive sealed bid to acquire construction independent of architect-engineer or construction management services, the governmental body may use a document in the form of AIA Document A701.

(b) If an agency acquires architect-engineer services independent of construction, the governmental body may use a document in the form of AIA Document B151.

(c) If an agency acquires construction independent of architect-engineer or construction management services, the governmental body may use documents in the form of ALA Document A101 and A201.

Other contract forms may be used as are approved by the State Engineer.

(d) If an agency acquires architect-engineer services, construction management services, and construction on the same project, each under separate contract, the governmental body may use documents in the form of AIA Documents A101/CMa, A201/CMa, B141/CMa, and B801/CMa. This paragraph does not apply if an agency acquires both construction and construction management services from the same business under the same contract.

(2) With prior approval of the State Engineer, a governmental body may supplement the contract forms identified in paragraph (1), as they have been amended by the State Engineer.

(3) Paragraph (1) does not apply to a contract entered into pursuant to Sections 11-35-1530, 11-35-1550, 11-35-3230, or 11-35-3310.

(4) For any contract forms specified herein, the Manual for Planning and Execution of State Permanent Improvements-Part II shall specify the appropriate edition or, if applicable, replacement form.

(5) For any contract forms not specified herein or otherwise required by law, the Manual for Planning and Execution of State Permanent Improvements-Part II may, without limitation, require the use of any appropriate contract document, standard industry contract form, standard state amendments to such documents or forms, or publish state specific contract forms. Absent contrary instructions in the Manual, the governmental body may use a contract written for an individual project.

(6) Construction under Procurement Code Section 11-35-1550 and 11-35-1530 may be in a format and description of services approved by the State Engineer.

F. Manual for Planning and Execution of State Permanent Improvements Projects.

For the purpose of these Regulations and Code Section 11-35-3240, a manual of procedures to be followed by governmental bodies for planning and execution of state permanent improvement projects is prepared and furnished by the designated board office, and included in this regulation. Part II of this manual, covering the procurement of construction for the projects, will be the responsibility of the Office of the State Engineer.

G. Prequalifying Construction Bidders.

In accordance with Section 11-35-3023, the State Engineer's Office shall develop procedures for a prequalification process and shall include it in the Manual for Planning and Execution of State Permanent Improvements-Part II. The provisions of Regulation 19-445.2132 shall apply to implement Section 11-35-3023.

H. With regard to Section 11-35-3310, the State Engineer's Office will establish working procedures for indefinite quantity contracts for professional services, and shall include them in the Manual for Planning and Execution of State Permanent Improvements-Part II. With regard to Section 11-35-3320, the State Engineer's Office will establish working procedures for task order contracts for construction services and shall include them in the Manual for Planning and Execution of State Permanent Improvements-Part II.

I. Construction Procurement-The Invitation for Bids.

The provisions of Regulation 19-445.2040 shall apply to implement the requirements of Section 11-35-3020(a), Invitation for Bids. The provisions of Regulation 19-445.2090(B) shall not apply to implement the requirements of Code Section 11-35-3020.

**J. Participation in Prior Reports or Studies.**

(1) Before awarding a contract for a report or study that could subsequently be used in the creation of design requirements for an infrastructure facility or service, the procurement officer should address, to the extent practical, the contractor's ability to compete for follow-on work.

(2) Before issuing a request for proposals for an infrastructure facility or service, the procurement officer should take reasonable steps to determine if prior participation in a report or study could provide a firm with a substantial competitive advantage, and, if so, the procurement officer should take appropriate steps to eliminate or mitigate that advantage.

(3) In complying with items (1) and (2) above, the procurement officer shall consider the requirements of Section 11-35-3245 and the Manual for Planning and Execution of State Permanent Improvements, Part II.

**K. Additional Procedures for Design-Build; Design-Build-Operate-Maintain; and Design-Build-Finance-Operate-Maintain.**

(1) Content of Request for Proposals. Each request for proposals (RFP) issued by the State for design-build, design-build-operate-maintain, or design-build-finance-operate-maintain services shall contain a cover sheet that: (a) confirms that design requirements are included in the RFP, (b) confirms that proposal development documents are solicited in each offeror's response to the RFP, and (c) states the governmental body's determination for that procurement (i) whether offerors must have been prequalified through a previous request for qualifications; (ii) whether the governmental body will select a short list of responsible offerors prior to discussions and evaluations (along with the number of proposals that will be short-listed); and (iii) whether the governmental body will pay stipends to unsuccessful offerors (along with the amount of such stipends and the terms under which stipends will be paid).

(2) Purpose of Design Requirements. The purpose and intent of including design requirements in the RFP is to provide prospective and actual offerors a common, and transparent, written description of the starting point for the competition and to provide the State with the benefit of having responses from competitors that meet the same RFP requirements. In order to be effective, the governmental body must first come to understand and then to communicate its basic requirements for the infrastructure facility to those who are considering whether they will participate in the procurement competition.

(3) Purpose of Requirement for Proposal Development Documents. The purpose and intent of including the requirement for submittal of proposal development documents in each RFP for design-build, design-build-operate-maintain, or design-build-finance-operate-maintain is to provide actual offerors with a common, and transparent, written description of the finish point for the competition. To be responsive, each offeror must submit drawings and other design related documents that are sufficient to fix and describe the size and character of the infrastructure facility to be acquired, including price (or life-cycle price for design-build-operate-maintain and design-build-finance-operate-maintain procurements).

(4) Content of Request for Proposals: Evaluation Factors. Each request for proposals for design-build, design-build-operate-maintain, or design-build-finance-operate-maintain shall state the relative importance of (1) demonstrated compliance with the design requirements, (2) offeror qualifications, (3) financial capacity, (4) project schedule, (5) price (or life-cycle price for design-build-operate-maintain and design-build-finance-operate-maintain procurements), and (6) other factors, if any by listing the required factors in descending order of importance (without numerical weighting), or by listing each factor along with a numerical weight to be associated with that factor in the governmental body's evaluation. Subfactors, if any, must be stated in the RFP and listed, pursuant to the requirements of this Regulation, either in descending order, or with numerical weighting assigned to each subfactor. The purpose and intent of disclosing the relative importance of factors (and subfactors) is to provide transparency to prospective and actual competitors from the date the RFP is first published.

(5) The Manual for Planning and Execution of State Permanent Improvement Projects - Part II must include guidelines for the proper drafting of design requirements, proposal development documents, and requests for proposals.

L. Errors and Omissions Insurance.

(1) For design services in design-bid-build procurements. A governmental body shall include in the solicitation such requirements as the procurement officer deems appropriate for errors and omissions insurance (commonly called “professional liability insurance” in trade usage) coverage of architectural and engineering services in the solicitation for design services in design-bid-build procurements.

(2) For design services to be provided as part of design-build procurements. A governmental body shall include in the solicitation for design-build such requirements as the procurement officer deems appropriate for errors and omissions insurance coverage of architectural and engineering services to be provided as part of such procurements. Prior to award, the head of a governmental body, or his delegee, shall review and approve the errors and omissions insurance coverage for all design-build contracts in excess of \$25,000,000.

(3) For design services to be provided as part of design-build-operate-maintain and design-build-finance-operate-maintain procurements. A governmental body shall include in the solicitation for design-build-operate-maintain and design-build-finance-operate-maintain such requirements as the procurement officer deems appropriate for errors and omissions insurance coverage of architectural and engineering services to be provided as part of such procurements. Prior to award, the head of a governmental body, or his delegee, shall review and approve the errors and omissions insurance coverage for all design-build-operate-maintain and design-build-finance-operate-maintain contracts in excess of \$25,000,000.

(4) For Construction Management (Agency) services. A governmental body shall include in the solicitation for construction management agency services such requirements as the procurement officer deems appropriate for errors and omissions insurance coverage.

(5) Errors and omissions (or professional liability) insurance coverage for construction management services is typically not required when the governmental body is conducting a construction management at-risk procurement.

M. Other Security; Operations Period Performance Bonds.

(1) Purpose.

To assure the timely, faithful, and uninterrupted provision of operations and maintenance services procured separately, or as one element of design-build-operate-maintain or design-build-finance-operate-maintain services, the governmental body shall identify, in the solicitation, one or more of the other forms of security identified in Section 11-35-3037 that shall be furnished to the governmental body by the offerors (or bidders) in order to be considered to be responsive.

(2) Operations Period Performance Bonds.

(a) If required in a solicitation for operation and maintenance, design-build-operate-maintain, or design-build-finance-operate-maintain, each offeror shall demonstrate in its offer that it is prepared to provide, and upon award of the contract, to maintain in effect an operations period performance bond that secures the timely, faithful, and uninterrupted performance of operations and maintenance services required under the contract, in the amount of 100% of that portion of the contract price that includes the cost of such operation and maintenance services during the period covered by the bond. In those procurements in which the contract period for operation and maintenance is longer than 5 years, the procurement officer may accept an operations period performance bond of five years’ duration, provided that such bond is renewable by the contractor every five (5) years during the contract, and provided further, that the contractor has made a firm contractual commitment to maintain such bond in full force and effect throughout the contract term.

(b) The operations period performance bond shall be delivered by the contractor to the governmental body at the same time the contract is executed. If a contractor fails to deliver the required bond, the contractor’s bid (or offer) shall be rejected, its bid security shall be enforced, award of the contract shall

be made to the next ranked bidder (or offeror), or the contractor shall be declared to be in default, as otherwise provided by these regulations.

(c) Operations period performance bond shall be in a form to be specified in the Manual for Planning and Execution of State Permanent Improvement, Part II. Each bond shall be issued by a Surety Company licensed in South Carolina with an "A" minimum rating of performance as stated in the most current publication of "Best Key Rating Guide, Property Liability", which company shows a financial strength rating of at least five (5) times the bond amount.

(3) Letters of Credit to Cover Interruptions in Operation.

(a) If required in a solicitation for operation and maintenance, design-build-operate-maintain, or design-build-finance-operate-maintain, each offeror shall demonstrate in its offer that it is prepared to post, and upon award of the contract shall post, and in each succeeding year adjust and maintain in place, an irrevocable letter of credit with a banking institution in this State that secures the timely, faithful, and uninterrupted performance of operations and maintenance services required under the contract, in an amount established under the contract that is sufficient to cover 100% of the cost of performing such operation and maintenance services during the next 12 months.

(b) The letter of credit required under this Section shall be posted by the contractor at the same time the contract is executed, and thereafter, shall be annually adjusted in amount and maintained by the contractor. If an offeror or bidder fails to demonstrate in its offer that it is prepared to post the required letter of credit, the bid (or offer) shall be rejected, the bid security shall be enforced, and award of the contract shall be made to the next ranked bidder (or offeror), as otherwise provided by these regulations. If the contractor fails to place and maintain the required letter of credit, the contractor shall be declared to be in default, as otherwise provided by these regulations.

(c) If required by the solicitation, letters of credit shall be in a form to be specified in the Manual for Planning and Execution of State Permanent Improvement, Part II.

(4) Guarantees.

(a) If required in a solicitation for operation and maintenance, design-build-operate-maintain, or design-build-finance-operate-maintain, the contractor and affiliated organizations (including parent corporations) shall provide a written guarantee that secures the timely, faithful, and uninterrupted performance of operations and maintenance services required under the contract, in an amount established under the contract that is sufficient to cover 100% of the cost of performing such operation and maintenance services during the contract period.

(b) The written guarantee required under this Section shall be submitted by each offeror at the time the proposal is submitted. If the contractor fails to submit the required guarantee, the contractor's bid (or offer) shall be rejected, its bid security shall be enforced, and award of the contract shall be made to the next ranked bidder (or offeror) as otherwise provided by these regulations.

(c) If required by the solicitation, guarantees shall be in a form to be specified in the Manual for Planning and Execution of State Permanent Improvement, Part II.

N. Construction Management At-Risk.

(1) Absent the approval required by Section 11-35-2010, a contract with a construction manager at-risk may not involve cost reimbursement.

(2) Prior to contracting for a GMP, all construction management services provided by a construction manager at-risk must be paid as a fee based on either a fixed rate, fixed amount, or fixed formula.

(3) As required by Section 11-35-3030(2)(a)(iv), construction may not commence until the bonding requirements of Section 11-35-3030(2)(a) have been satisfied. Subject to the foregoing, bonding may be provided and construction may commence for a designated portion of the construction.

(4) In a construction management at-risk project, construction may not commence for any portion of the construction until after the governmental body and the construction manager at risk contract for a fixed price or a GMP regarding that portion of the construction. Prior to executing a contract for a fixed price or a GMP, a governmental body shall comply with Section 11-35-1830 and Regulation 19-445.2120, if applicable. For purposes of Section 11-35-1830(3)(a), adequate price competition exists for all

components of the construction work awarded by a construction manager at-risk on the basis of competitive bids.

(5) When seeking competitive sealed proposals in a construction management at-risk procurement, the solicitation shall include a preliminary budget, and if applicable, completed programming and the conceptual design. The solicitation shall request information concerning the prospective offeror's qualifications, experience, and ability to perform the requirements of the contract, including but not limited to, experience on projects of similar size and complexity, and history of on-time, on-budget, on-schedule construction. The offeror's proposed fee may be a factor in determining the award.

(6) After all preconstruction services and final construction drawings have been completed, or prior thereto upon written determination by the procurement officer, a governmental body must negotiate with and contract for a GMP with a construction manager at-risk. If negotiations are unsuccessful, the governmental body may issue an invitation for bids, as allowed by this code, for the remaining construction.

(7) A governmental body shall have the right at any time, and for three years following final payment, to audit the construction manager at-risk to disallow and to recover costs not properly charged to the project. Any costs incurred above the GMP shall be paid for by the construction manager at-risk.

(8) A construction manager at-risk may not self-perform any construction work for which subcontractor bids are invited, unless no acceptable bids are received or a subcontractor fails to perform. Ordinarily, the contract with a construction manager at-risk should require the construction manager at-risk to invite bids for all major components of the construction work. Section 11-35-4210 does not apply to any subcontractor bid process conducted by a construction manager at-risk.

#### 19-445.2150. Surplus Property Management.

(Statutory Authority: 1976 Code Section 11-35-3810)

##### A. Definition, Authority and Mission.

###### (1) Definition.

Surplus property is all State-owned supplies and equipment, not in actual public use, with remaining useful life and available for disposal. This definition and the ensuing regulations exclude the disposal of solid and hazardous wastes as defined by any federal, state or local statutes and regulations. Property so defined as solid or hazardous waste shall not be relocated, nor title assumed under the authority of these regulations.

###### (2) Authority.

The disposition of all surplus property shall be conducted by the General Service Division's Surplus Property Management Office (SPMO) at such places and in such manner determined most advantageous to the State, except as defined in Section 11-35-1580 of the Procurement Code. All government bodies must identify surplus items and declare them as such, and report them in writing to the SPMO within one hundred and eighty (180) days from the date they become surplus. The SPMO shall deposit the proceeds from such disposition, less expense of the disposition, in the State's General Fund unless a government body makes a written request to retain such proceeds, less cost of disposition, for the purchase of like kind property and the SPMO, or his designee, approves such request.

###### (3) Mission.

The primary mission of the Surplus Property Management Office shall be to receive, warehouse and dispose of the State's surplus property in the best interest of the State. The central warehousing of State surplus property will allow all State governmental bodies and other political subdivisions one location to acquire needed property.

The purpose of this program is to provide the following:

1. elimination of costs related to the warehousing, insurance and accounting systems necessary to fulfill an agency's surplus property responsibility,
2. maximization of proceeds by disposing of property as soon as possible after it becomes excess to an agency's needs,
3. establishment of priorities in the disposal process that encourage keeping assets in public use as long as possible,

4. conversion of unneeded fixed assets into available funds on a timely basis .

**B. Reporting and Relocation of Surplus Property.**

**(1) Reporting.**

Within one hundred eighty (180) days from the date property becomes surplus, it must be reported to the SPMO on a turn-in document (TID) designed by the SPMO. The description, model or serial number, acquisition cost, date of purchase and agency ID number shall be listed for each item.

Upon receipt of the TID, the SPMO will screen the property to determine whether it is surplus or junk as defined in these regulations.

**(2) Property Relocation.**

Surplus property reported shall be scheduled for relocation to the SPMO, Boston Avenue, West Columbia; or, upon consultation and agreement with the generating governmental body, remain at the governmental body's site if deemed by the SPMO to be a more cost-effective method for disposal.

At such time as property is officially received by the SPMO, title will pass to the General Services' Division and shall be accounted for as described herein. Governmental bodies shall delete insurance coverage on such property. The SPMO shall carry sufficient insurance to ensure these assets are safeguarded against loss. Governmental bodies shall delete such property from their fixed asset records at this point of transfer. Upon disposal of the property, the proceeds, less cost of disposition, will be returned to the authorized revenue center if so requested and authorized in accordance with these regulations.

If determined to be junk, disposal will be the responsibility of the generating governmental body in accordance with Section 11-35-4020 of the Procurement Code.

**C. Transfer of Surplus Property to Governmental Bodies, Political Subdivisions, and Eligible Nonprofit Health or Education Institutions.**

**(1) Eligibility.**

The SPMO's primary role shall be to relocate surplus property to eligible Donees which includes governmental bodies, political subdivisions and nonprofit health and educational institutions.

The term governmental bodies means any State government department, commission, council, board, bureau, committee, institution, college, university, technical school, legislative body, agency government corporation, or other establishment or official of the executive, judicial, or legislative branches of the State. The term political subdivisions includes counties, municipalities, school districts or public service or special purpose districts. The term eligible nonprofit health or educational institutions means tax-exempt entities, duly incorporated as such by the State. SPMO shall be responsible for determining an applicant's eligibility prior to any transfer of property.

The SPMO will maintain sufficient records to support the eligibility status of these entities.

**(2) Determination of Sale Price.**

The sale price for all items will be established by the Manager of Surplus Property or the Manager's designee. The Manager or the Manager's designee shall have the final authority to accept or reject bids received via public sale. The following categories and methods will be used:

(a) Vehicles: NADA loan value shall be used for the sale price. In certain instances, the most recent public sale figures and consultation with the generating governmental body shall be the basis for a sale price.

(b) Boats, motors, heavy equipment, farm equipment, airplanes and other items with an acquisition cost in excess of \$5,000: The sale price shall be set from the most recent public sale figures and/or any other method necessary to establish a reasonable value including consultation with the generating governmental body.

(c) Miscellaneous items with an acquisition cost of \$5,000 or less such as office furniture and machines, shop equipment, cafeteria equipment, etc.: A sale price will be assessed based on current market conditions.

**(3) Terms and Conditions on Property Transferred from Warehouse.**

For any purchases made under this subsection, the purchasing entity will certify that all items acquired will be for the sole benefit of the buying institution and that no personal use will be involved. This certification will be formalized by the agreement signed at the time eligibility is established. The following terms and conditions will be set forth therein:

(1) Property must be placed into public use within one (1) year of acquisition and remain in use one (1) year from the date placed into actual use.

(2) Property which becomes unusable may be disposed of prior to the one-year limitation with the approval of the SPMO.

A utilization visit may be made by authorized personnel of the SPMO. All vehicles and property with an acquisition cost in excess of \$5,000 require a utilization review during the twelve-month period from date of transfer to ensure the property is in public use.

(A) Any misuse of property will be reported in writing to the SPMO's Manager by the utilization staff of the SPMO. The SPMO Manager shall have the authority to suspend all further purchases until a determination can be made under Subsection B. If warranted, the matter shall be referred to the proper law enforcement authority for full investigation.

(B) Upon determination that misuse of property has occurred, purchasing privileges will be terminated and not restored until the buying governmental body, political subdivision, or nonprofit health or educational institution pays to the SPMO the fair market value of the item(s) misused or returns the misused property to the SPMO.

(4) Disposition Cycles for Surplus Property.

An appropriate cycle methodology as determined in the SPMO's sole discretion shall be used for the disposal process of surplus property. Governmental bodies, political subdivisions and nonprofit health and educational institutions, and any other qualifying donees will be given priority over the general public to acquire the property.

Special items and heavy equipment, will generally follow the same disposal procedures as other property. When vehicles are the items in question, they will be held for two weeks to allow State agencies purchasing priority. However, the SPMO shall have the authority to deviate from these procedures in circumstances where cost avoidance, space requirements, market conditions, accessibility and manpower are considerations. The SPMO must document that such procedure is advantageous to the State.

D. Public Sale of Surplus Property.

(1) Public Sale Cycle.

Upon completion of the Donee sales cycle, the remaining items shall be made available to the public. Donees and the general public may purchase in this period, but without priority. This period has no minimum or maximum length and is determined by warehouse space and scheduled incoming property. There will also be times when property will not be made available for a Public Cycle Sale.

(2) Final Disposition by Competitive Public Sale.

When surplus property is sold via the competitive sealed bid process, notification of such sale shall be given through a Notice of Sale to be posted at the SPMO at least fifteen (15) days prior to the bid opening date. The sale shall also be announced through advertisement in newspapers of general circulation, the South Carolina Business Opportunities publication and such electronic or other media as deemed appropriate by the SPMO. The Notice of Sale shall list the supplies or property offered for sale; designate the location and how property may be inspected; and state the terms and conditions of sale and instructions to bidders including the place, date, and time set for bid opening. Bids shall be opened publicly.

Award shall be made in accordance with the provisions set forth in the Notice of Sale and to the highest responsive and responsible bidder provided that the price offered by such bidder is deemed reasonable by the SPMO or his designee. Where such price is not deemed reasonable, the bids may be rejected in whole, or in part, and the sale negotiated beginning with the highest bidder provided the negotiated sale price is higher than the highest responsive and responsible bid. In the event of a tie bid the award will be made in accordance with the tie bid procedure set forth in Section 11-35-1520(9) of the Consolidated Procurement Code.

Property may also be sold at a public auction by an experienced auctioneer. The Notice of Sale shall include, at a minimum, all terms and conditions of the sale and a statement clarifying the authority of the SPMO, or his designee, to reject any and all bids. These auctions will be advertised in a newspaper of general circulation or on the radio, or both.

(3) Other Means of Disposal.

Some types and classes of items can be sold or disposed of more economically by some other means of disposal including barter, appraisal, electric commerce and web based sales. In such cases, and also where the nature of the supply or unusual circumstances necessitate its sale to be restricted or controlled, the SPMO may employ such other means provided the SPMO makes a written determination that such procedure is advantageous to the State.

(4) Designation of Surplus Property.

Upon written determination by the SPMO that surplus property items are needed to comply with programs authorized by the legislature or by executive order of the governor exercising his statutory authority, the SPMO may designate surplus property items for disposal in order to comply with the program requirements. The SPMO will develop and implement internal guidelines and procedures for the disposal of surplus property items designated as necessary to comply with the program requirements established by the legislature or the governor.

E. Fee Schedule.

The State Surplus Property Management Program will operate solely from service charges retained from the sale of surplus property. The Board shall establish a fee schedule sufficient to fund all program costs and it shall be reviewed by the Board as required to ensure the adequacy and equity of the Program.

F. Inventory and Accounting Systems.

(1) Forms.

Turn-in documents designed by the SPMO shall be used by all governmental bodies for reporting surplus property to the SPMO. It shall be the responsibility of the generating governmental body to obtain these forms and to furnish all information required on the form. Items received by the SPMO shall be physically checked by the SPMO against the turn-in document and a signed receipt issued to the governmental body.

(2) Tagging.

Items received by the SPMO shall be assigned an inventory number and data including generating governmental body, description of property, quantity, original acquisition cost, and other relevant information entered into an automated inventory system. Inventory tags listing all necessary information shall be attached to each item.

(3) Display.

Items shall be displayed in locations with other like commodities to allow for easy viewing.

(4) Issuing property.

All items sold by the SPMO to governmental bodies, political subdivisions and nonprofit health or educational institutions shall be recorded on a Bill of Sale and all required information shall be listed on the document. The Bill of Sale must be signed by the signatory authority of the governmental body, political subdivision or nonprofit health or educational institution as defined in Subsection C, Item 1 of these regulations. At the time of sale, the eligible entity shall receive a copy of the Bill of Sale.

(5) Invoicing.

Invoices shall be generated and mailed to the acquiring agency. All cash and accounts receivable transaction records shall be properly maintained. All transfers of funds to various accounts will be performed in accordance with these regulations.

(6) Deletions.

Items shall be deleted from the SPMO's inventory simultaneously with the invoicing process or by written justification from the Surplus Property Management Officer or his designee.

(7) Property sold to the public shall be paid for in full at the time of purchase.

Transactions shall be documented by a Bill of Sale enumerating all conditions of the sale i.e., "as is, where is," etc. and must be signed by the purchaser. Personal checks with proper identification, certified checks, or money orders made payable to the State of South Carolina or cash or credit cards shall be accepted as a form of payment. A copy of the Bill of Sale shall be presented to the purchaser as a receipt.

G. Trade In Sales.

Governmental bodies may trade in personal property, whose original unit purchase price did not exceed \$5,000, the trade in value of which must be applied to the purchase of new items. When the original unit

purchase price exceeds \$5,000, the governmental body shall refer the matter to the SPMO, or his designee, for disposition.

The SPMO, or his designee, shall have the authority to determine whether the property shall be traded in and the value applied to the purchase of new like items or classified as surplus and sold in accordance with the provisions of Section 11-35-3820 of the Procurement Code. When the original purchase price exceeds \$100,000, the SPMO, or his designee, shall make a written determination as to its reasonableness and document such trade-in transaction.

#### H. Definition of Junk.

Junk is State-owned supplies and equipment having no remaining useful life in public service and the cost to repair or to refurbish the property exceeds the value of like used equipment, or the cost of transporting the property for sale exceeds the likely recovery from a sale. Property that may be recycled is not considered junk. The classification of property as junk is at the sole discretion of the SPMO.

#### I. Unauthorized Disposal.

(1) The ratification of an act of unauthorized and/or improper disposal of State property by any persons without the requisite authority to do so by an appointment or delegation under the Procurement Code rests with the Surplus Property Management Officer.

#### (2) Corrective Action and Liability.

In all cases, the head of the disposing agency shall prepare a written determination describing the facts and circumstances surrounding the act, corrective action being taken to prevent recurrence, and action taken against the individual committing the act and shall report the matter in writing to the SPMO within ten (10) days after the determination.

#### J. Authority to Debar or Suspend.

The procedures and policies set forth in Section 11-35-4220 of the Procurement Code shall apply to the disposal of State property. The authority to debar a person from participation in the public sales of State-owned property shall rest with the Materials Management Officer.

#### 19-445.2152. Leases, Lease/Payment, Installment Purchase, and Rental of Personal Property.

A. Justification. A governmental body proposing to enter into an agreement other than an outright purchase is responsible for the justification of such action. Lease, lease/purchase, installment purchase, or rental agreements are subject to the procedures of the Procurement Code and these Regulations.

B. Procedures. Upon written justification by the procurement officer of the governmental body of such alternate method, the following procedures will be followed:

(1) The State of South Carolina Standard Equipment Agreement will be used in all cases unless modifications are approved by the ~~designated board officer~~ [Director of the Division of Procurement Services](#) or his designee. A purchasing agency may enter into an agreement for the rental of equipment without using the Standard Equipment Agreement when the agreement has a total potential value of fifteen thousand dollars or less or the agreement does not exceed ninety days in duration.

(2) Installment purchases will require the governmental body to submit both a justification and purchase requisition to the appropriate chief procurement officer or his designee for processing.

(3) All lease/purchase and installment sales contracts must contain an explicitly stated rate of interest to be incurred by the State under the contract.

#### 19-445.2155. Intergovernmental Relations.

##### A. Selective Mandatory Opting.

As provided in the solicitation, local political subdivisions such as counties, municipalities, school districts, public service or special purpose districts and the Federal Government may purchase from or through the State at any time. When the appropriate chief procurement officer determines prior to establishment of a contract that localities must mandatorily opt in or out of the contract, the following procedures shall be followed:

(1) Sixty (60) days prior to establishment of a particular contract, the appropriate chief procurement officer shall publicly notify local political subdivision of the mandatory opting requirement; and

(2) Require local political subdivisions to advise the appropriate chief procurement officer within 30 days of its desire to participate in the contract.

#### 19-445.2160. Assistance to Minority Businesses.

##### A. Definitions

(1) “Minority Person” means a United States citizen who is economically and socially disadvantaged.

(2) “Socially disadvantaged individuals” means those individuals who have been subject to racial or ethnic prejudice or cultural bias because of their identification as members of a certain group without regard to their individual qualities. Such groups include, but are not limited to, Black Americans, Hispanic Americans, Native Americans (including American Indians, Eskimos, Aleuts and Native Hawaiians), Asian Pacific Americans, Women and other minorities to be designated by the South Carolina Budget and Control Board or designated agency.

(3) “Economically disadvantaged individuals” means those socially disadvantaged individuals whose ability to compete in the free enterprise system has been impaired due to diminished capital and credit opportunities as compared to others in the same business area who are not socially disadvantaged.

(4) “A socially and economically, disadvantaged small business” means any small independent business concern which:

(a) At a minimum is fifty one (51) percent owned by one or more citizens of the United States who are determined to be socially and economically disadvantaged and who also exercise control over the business per 49 CFR Part 26, Subpart D (2006), as amended.

(b) In the case of a corporation, at a minimum, fifty-one (51) percent of all classes of voting stock of such corporation must be owned by an individual or individuals determined to be socially and economically disadvantaged who also exercise control over the business.

(c) In the case of a partnership, at a minimum, fifty-one (51) percent of the partnership interest must be owned by an individual or individuals determined to be socially and economically disadvantaged who also exercise control over the business.

(5) “Small Business” means a for-profit concern, including its affiliates, that is independently owned and operated, not dominant in the field of operation in which it is bidding on government contracts, and qualified as a small business under the criteria and size standards in 13 C.F.R. Section 121 (1996), as amended. Such a concern is “not dominant in its field of operation” when it does not exercise a controlling or major influence on a national basis in a kind of business activity in which a number of business concerns are primarily engaged. In determining whether dominance exists, consideration shall be given to all appropriate factors, including volume of business, number of employees, financial resources, competitive status or position, ownership or control of materials, processes, patents, license agreements, facilities, sales territory, and nature of business activity.

(6) “Minority Business Enterprise” is a business which has been certified as a socially and economically disadvantaged small business.

(7) “OSMBA” means the Office of Small and Minority Business Assistance.

##### B. Certification as a Minority Business Enterprise (MBE)

(1) A South Carolina business seeking certification as a Minority Business Enterprise must submit to OSMBA an application and any supporting documentation as may be required.

(2) Certification Process. The Certification Board within OSMBA will determine if the business is controlled and operated by socially and economically disadvantaged individuals. Upon recommendation of the Certification Board, OSMBA will certify the business as a socially and economically disadvantaged small business and issue a Certification as authorized by Section 11-35-5270 of the Procurement Code. Firms may re-apply to OSMBA one year after denied certification. Certifications are valid for five years. Firms may apply for re-certification by submitting an application and required supporting documents of eligibility.

##### C. Certification Board/Procedures

(1) The certification board, as defined below, is responsible for reviewing files and applications in order to determine whether a business should be recommended for approval or disapproval by the Director of the OSMBA (hereinafter referred to as the Director) as a certified business in compliance with Article 21.

(2) The certification board shall include three (3) members of the Office in which the OSMBA is located and is chaired by a member selected by the Director. The board will meet at the request of the Director.

(3) Applications for certification must be addressed to the Director. Upon receipt, OSMBA shall conduct an investigation of the applicant and provide the results to the Certification Board. Failure to furnish requested information will be grounds for denial or revocation of certification.

#### D. Eligibility

In order for a firm to be certified, the business must have an office in South Carolina, duly registered and licensed as a South Carolina business, it must be found to be a small independent business owned and controlled by a person or persons who are socially and economically disadvantaged. The following factors will be considered in determining whether the applicant is eligible for certification:

##### (1) Small Business

The business must meet the definition of small business contained in Subsection A hereof.

##### (2) Independent Business

a. Recognition of the business as a separate entity for tax or corporate purposes is not necessarily sufficient for certification under Article 21. In determining whether an applicant for certification is an independent business, OSMBA shall consider all relevant factors, including the date the business was established, the adequacy of its resources, and relationships with other businesses.

b. A joint venture is eligible if one of the certified business partners of the joint venture meets the standards of a socially and economically disadvantaged small business and this partner's share in the ownership, control and management responsibilities, risks and profits of the joint venture is at least 51 percent, and this partner is also responsible for a clearly defined portion of the work to be performed.

##### (3) Ownership and Control

a. The business must be 51 percent owned by socially and economically disadvantaged persons. The OSMBA will examine closely any recent transfers of ownership interests to insure that such transfers are not to be made for the sole purpose of obtaining certification.

b. Ownership shall be real, substantial and continuing and shall go beyond the pro forma structure of the firm as reflected in its ownership documents. The minority owners shall enjoy the customary incidents of ownership and shall share in the risks and profits commensurate with their ownership interests, as demonstrated by an examination of the substance rather than form of ownership arrangements.

c. The contribution of capital or expertise by the minority or women owners to acquire their interest in the business shall be real and substantial. Examples of insufficient contributions include gifts, inheritance, a promise to contribute capital, a note payable to the business or its owners who are not socially disadvantaged and economically disadvantaged, or the participation as an employee, rather than as a manager.

d. The minority owners must have management responsibilities and capabilities including the ability to hire and fire personnel at the highest level and to exercise financial control. A previous and/or continuing employer-employee relationship between or among present owners is carefully reviewed.

e. Where the actual management of the firm is contracted out to individuals other than the owner, those persons who have the ultimate power to hire and fire the managers can, for the purpose of this part, be considered as controlling the business.

f. Any relationship between a business that is applying for certification under Article 21 and a business which is not certified will be carefully reviewed to determine if there are conflicts with the ownership and control requirement of this section.

g. All securities which constitute ownership and/or control of a business for purposes of establishing it as a Minority shall be held directly by minorities. No securities held in trust, or by any guardian for a minor, shall be considered in determining ownership or control.

##### (4) Socially Disadvantaged

The only factor to be considered in determining whether a firm is socially disadvantaged is membership in a minority group which is listed in Subsection A hereof. Membership shall be established on the basis of

the individual's claim that he or she is a member of one of the minority groups included in the definition of socially disadvantaged in Subsection A above and is so regarded by that particular group.

(5) Economically Disadvantaged

a. OSMBA will make a determination of whether a firm is socially disadvantaged before proceeding to make a determination of economic disadvantage. If OSMBA determines that the business owner is not socially disadvantaged, it is not necessary to make the economically disadvantaged determination.

b. OSMBA may consider as evidence of the business owner's economic disadvantage the following: unequal access to credit or capital; acquisition of credit under unfavorable circumstances; difficulty in meeting requirements to receive government contracts; discrimination by potential clients; exclusion from business or professional organizations; and other similar factors which have restricted the owner's business development.

c. In determining the degree of diminished credit and capital opportunities of a socially disadvantaged individual, consideration will be given to both the disadvantaged individual and the business with which he or she is affiliated.

d. In considering the economic disadvantages of businesses and owners, OSMBA will make a comparative judgement about relative disadvantage. The test is not absolute deprivation, but rather whether the individuals and businesses owned by such individuals are disadvantaged in this respect.

e. It is the responsibility of an applicant business and its owner(s) to provide information to OSMBA about its economic situation when it seeks certification. OSMBA will be making a judgement about whether the applicant business and its socially disadvantaged owner(s) are in a more difficult economic situation than most businesses (including established businesses) and owners who are not socially disadvantaged. OSMBA is not required to make a detailed, point-to-point, accountant like comparison of the businesses involved.

E. Decertification

OSMBA reserves the right to cancel a certification at any time if a business becomes ineligible after certification. OSMBA will take action to ensure that only firms meeting the eligibility requirements stated herein qualify for certification. OSMBA will also review the eligibility of businesses with existing certifications to ensure that they remain eligible. A business organization's, ownership or control can change over time resulting in a once eligible business becoming ineligible. Certified businesses must notify OSMBA, in writing within 30 days, of changes in organization, ownership or control. When OSMBA determines that an existing business may no longer be eligible, it will file a Complaint with the Certification Board, and send a copy of the Complaint by certified mail to the business. Upon receipt of such a complaint, the Certification Board shall conduct a hearing in accordance with the procedures set forth in the Administrative Procedures Act (Section 1-23-310, et seq., Code of Laws of South Carolina, 1976, as amended).

19-445.2165. Gifts

A. Policy

It is the policy of the State that a governmental body should not accept or solicit a gift, directly or indirectly, from a donor if the governmental body has reason to believe the donor has or is seeking to obtain contractual or other business or financial relationships with the governmental body.

B. Future Contracts with Donors

Prior to accepting a gift, care should be taken to determine whether acceptance of the gift will provide the donor, directly or indirectly, an undue competitive advantage in subsequent procurements.

C. Definition

For purposes of this Regulation 19-445.2165, the term "donor" means the business donating the gift and all divisions or other organizational elements of the business and any principals and affiliates of the business. For purposes of this Regulation, business concerns, organizations, or individuals are affiliates of each other if, directly or indirectly, either one controls or has the power to control the other, or a third party controls or has the power to control both. Indications of control include, but are not limited to, interlocking management or ownership, identity of interests among family members, shared facilities and equipment,

common use of employees, or a business entity organized subsequent to the gift which has the same or similar management, ownership, or principal employees as the business that made the gift. For purposes of this section, the term ‘principals’ means officers, directors, owners, partners, and persons having primary management or supervisory responsibilities within a business entity including, but not limited to, a general manager, plant manager, head of a subsidiary, division, or business segment, and similar positions.

19-445.2180. Assignment, Novation, and Change of Name.

A. ~~No Assignment~~“Novation agreement” is a contractual amendment by which the State recognizes a successor in interest to a State contract as provided in this regulation. The successor in interest assumes all the obligations under the contract and the transferor, when still in existence, typically guarantees the performance of the contract by the transferee.

B. No Assignment.

No State contract is transferable, or otherwise assignable, without the written consent of the Chief Procurement Officer, the head of a purchasing agency, or the designee of either; provided, however, that a contractor may assign monies receivable under a contract after due notice from the contractor to the State.

BC. Recognition of a Successor in Interest; Novation.

When in the best interest of the State, a successor in interest may be recognized in a novation agreement in which the transferor and the transferee shall agree that:

- (1) the transferee assumes all of the transferor’s obligations;
- (2) the transferor waives all rights under the contract as against the State; and
- (3) unless the transferor guarantees performance of the contract by the transferee, the transferee shall, if required, furnish a satisfactory performance bond.

CD. Change of Name.

When a contractor requests to change the name in which it holds a contract with the State, the procurement officer responsible for the contract may, upon receipt of a document indicating such change of name (for example, an amendment to the articles of incorporation of the corporation), enter into an agreement with the requesting contractor to effect such a change of name. The agreement changing the name shall specifically indicate that no other terms and conditions of the contract are thereby changed.

19-445.2200. Administrative Review Protective Orders.

A. At the request of any party or on its own initiative, the appropriate chief procurement officer or the Procurement Review Panel may issue a protective order controlling the treatment of protected information for purposes of a protest or other proceeding currently pending before it. Such information may include any information exempt from public disclosure by law, such as information exempt from disclosure under Sections 11-35-410 and 30-4-40. The protective order shall establish procedures for application for access to protected information and for identification and safeguarding of that information. Because a protective order serves to facilitate the pursuit of a protest or other administrative proceeding by a protester through counsel, it is the responsibility of protester’s counsel to request that a protective order be issued and to submit timely applications for admission under that order. Protected information received by a person pursuant to a protective order issued under this regulation shall be released only pursuant to and in compliance with the protective order.

B. A protective order may not prohibit a public body from releasing information which the public body must release under applicable law. A protective order may not require the release of any public record that a public body is prohibited from releasing by law. Issuance of a protective order does not preclude a party from asserting any legally cognizable privilege to withhold any document or information.

C. Before being permitted to view any protected information, counsel and any consultants retained by counsel who will review or utilize any protected information must file an application for access in accordance with the conditions of the protective order. To be entitled to access, an applicant must establish that the applicant is not involved in competitive decision-making for any firm that could gain a competitive advantage from access to the protected information and that there will be no significant risk of inadvertent disclosure of protected information. A consultant will not be permitted access to protected information if

he or she is employed by a party to the action or is working under a contract to a party. Objections to granting an applicant access to protected information must be in writing and filed within two business days after the person receives a copy of the application for access.

D. Any violation of the terms of a protective order may result in the imposition of such sanctions as the CPO or Procurement Review Panel, as applicable, deems appropriate, including referral to appropriate bar associations or other disciplinary bodies and restricting the individual's practice before the CPO or Panel. A business aggrieved by violation of a protective order may seek enforcement of such order in any available judicial or administrative forum.

19-445.3000. School District Procurement Codes; Model.

A. Application.

Under Section ~~11-35-70~~ [11-35-5340](#), a school district is exempt from the South Carolina Consolidated Procurement Code (except for a procurement audit) if the district has its own procurement code which is, in the written opinion of the ~~Office of General Services of the State Budget and Control Board~~ [Division of Procurement Services of the State Fiscal Accountability Authority](#), substantially similar to the provisions of the Consolidated Procurement Code and regulations in effect at the time the opinion is issued.

B. Delegation.

The authority and responsibilities under Section ~~11-35-70~~ [11-35-5340](#) are hereby delegated to the Materials Management Officer.

C. Substantially Similar.

To qualify for approval, a district code should largely mirror, but need not be identical to, the Consolidated Procurement Code. Because a district code needs only to be substantially similar to the consolidated procurement code and regulations, a district code may accommodate the differing context of school districts (e.g., differences between state government and local school district operations, including size, purchasing staff resources, volume and type of procurements, and structure of its governing body and executive hierarchy) as long as it preserves the sound procurement policies and practices underlying the rules found in the consolidated procurement code and regulations.

D. Definitions.

Covered District means a school district subject to the requirements of Section ~~11-35-70~~ [11-35-5340](#). Model code means a model school district procurement code and any subsequent modifications to the model code, including instructions regarding how each district may customize the model code to an individual district's organizational structure.

E. Guidelines; Model Code.

By requiring a written opinion, Section ~~11-35-70~~ [11-35-5340](#) provides for an exercise of judgment. The best interest of the state is served by exercising this judgment in a consistent manner. Accordingly, the Materials Management Office may publish guidance regarding its exercise of this judgment, including publication of a model code. In developing a model code, the Materials Management Officer should consult with all covered districts and the State Department of Education. Any model should be designed to serve and comply with the purposes and policies enumerated in Section ~~11-35-20~~ in the specific context of local school district operations, with due regard for minimizing administrative costs of compliance with the model code. Prior to publishing a model code, the Materials Management Officer must determine in writing that the model code is substantially similar to the provisions of the South Carolina Consolidated Procurement Code and these procurement regulations. Any school district may adopt the model code.

F. Duration of Written Opinion.

A written opinion issued pursuant to Section ~~11-35-70~~ [11-35-5340](#) remains valid for a covered district's procurement code until the covered district seeks and receives a written opinion for modifications to its procurement code.

G. Effect of Adoption.

A procurement code adopted by a school district in accordance with all applicable law shall have the full force and effect of law.
