Economy and Plan Overview

Economic & Capital Market Highlights

As of September 30, 2014

ECONOMIC

- U.S. economic growth continued in Q3, led by an increase in consumer spending, improving employment, corporate M&A's and firming home values.
 - Personal Consumption Expenditures (PCE) increased 1.5% y-o-y in Sept.
 - Unemployment dropped to 5.9% by the Q3-end, its lowest level since 2008.
 - Q2 GDP came in at 4.6%, a significant increase over Q1's -2.1% decline.
 - Strong U.S. M&A activity continued with 29% y-o-y growth in Q3.
 - Home prices continued to rise, despite some deceleration in July.
 - Fears of U.S. inflation abated with inflation forecast at below 2% during Q3.
- The dollar gained 8% against the euro and yen due to high relative yields in the U.S., heightened geopolitical risk and divergent global monetary policy.
- U.S. crude oil futures lost around 13%, ending September just above \$91.
- The Federal Reserve remained on track to end QE in October.

CAPITAL MARKETS

- U.S. stocks rose modestly, with the S&P 500 Index edging 1.1% higher, the seventh consecutive quarterly gain for the index.
- The Chicago Board Options Exchange SPX Volatility Index (the VIX) finished the quarter at 16.3, up 41% from the multi-year low established in Q2.
- Emerging markets (-3.5%) continued to outperform developed (-5.9%).
- The Barclays Aggregate, U.S. Treasury and U.S. Mortgage indexes ended Q3 in positive territory as yields rose and investors sought relative value and safety.
- Global bonds (-3.1%) suffered the worst returns within fixed income as higher U.S. yields combined with the appreciating dollar to detract from results.
- Both TIPs (-2.0%) and REITs (-2.6%) reversed course during Q3 as a result moderating inflation expectations and rising interest rates.
- Small caps again trailed all major asset classes during the quarter.

MARKET PERFORMANCE

	<u>Quarter</u>	<u>1 Year</u>	<u>3 Year</u>	<u>5 Year</u>

Barclays Global Aggregate	-3.14	1.19	1.16	2.69
NAREIT-All REIT Composite	-2.64	13.17	16.56	15.57

LOOKING AHEAD

- Return of market volatility.
- Impact of divergent global monetary policy (U.S., Europe).
- Slowing global growth led by Europe, China and Japan.
- Consensus growing that the Fed will raise rates next year.
- Flat wage growth in the U.S. threatens consumer spending.
- Headline risk: Ebola, ISIS, Ukraine, Hong Kong.
- Reduced asset class correlations favor active management.

Defined Contribution Market News

As of September 30, 2014

Participant Behavior

- According to a report issued by the Employee Benefit Research Institute (EBRI), 62% of retirees left their account balance in their employer sponsored plan, 22% rolled their balance into an IRA, and 15% took a lump sum (taxable) distribution. Only 1% of participants reported purchasing an annuity.

Plan Structure Observations

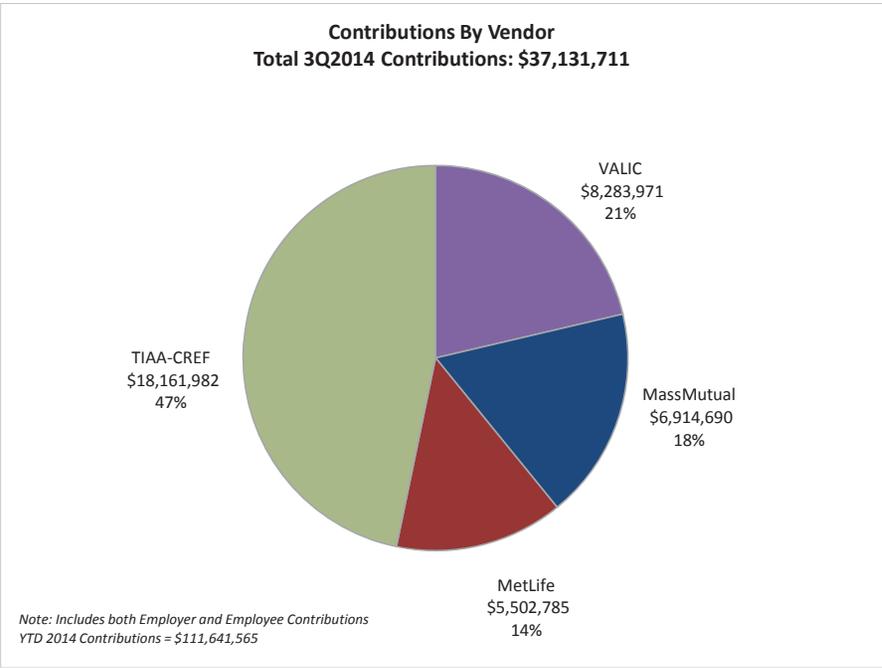

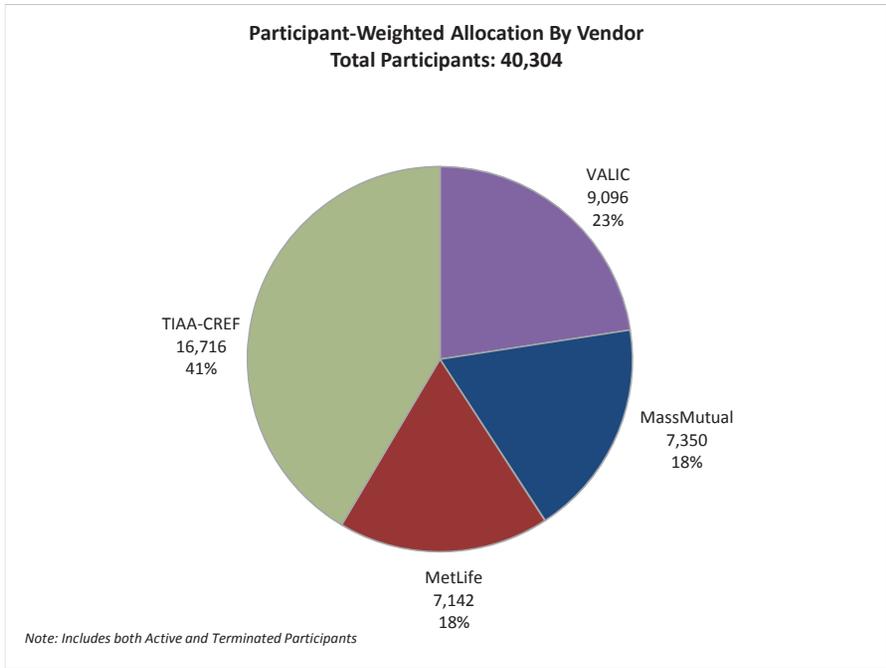

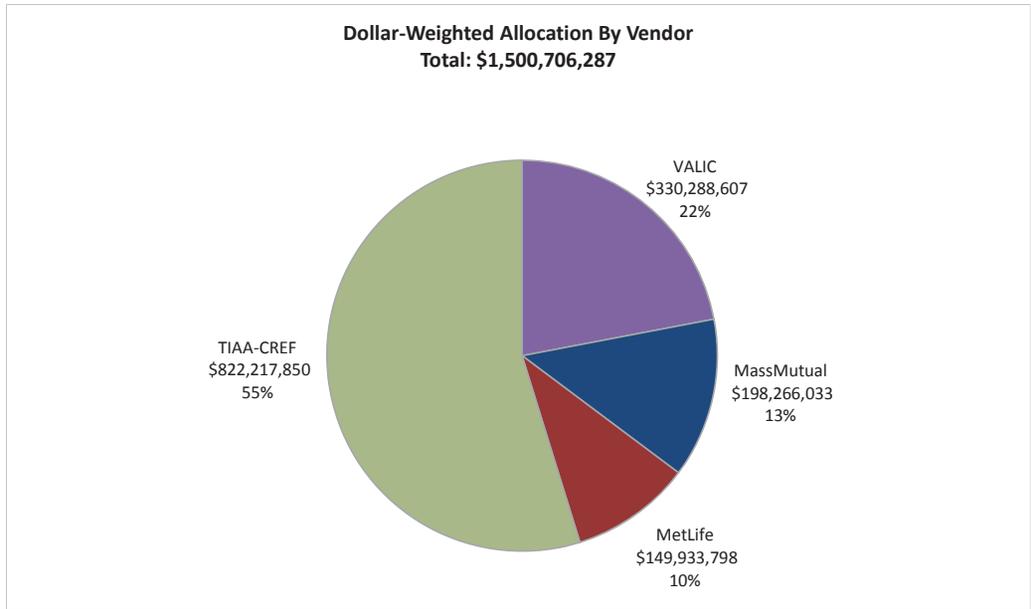

- Vanguard released its How America Saves 2014 report. Among the findings:
 - The median participant age was 46 with 8 years of plan tenure.
 - The median and average account balances were \$31,396 and \$101,650, respectively.
 - Given the wide variance, sponsors should evaluate both statistics, as the average tends to be skewed towards older, higher account balance holders.
 - 86% of plan sponsors offered a series of target date funds in their investment menu, up from 26% in 2008.
 - The average number of funds offered and used was 18 and 3, respectively, approximately the same since 2009.
 - The median and average employee deferral rates were 6.0% and 7.0%, respectively.
 - The median and average total plan contribution rates (employee deferral and employer match) were 9.2% and 10.2%, respectively.
 - 52% of plans offer a Roth option, but only 13% of those plan participants use the option.
 - Relatively few (10%) of participants placed active trades within their accounts in 2013.
 - No material change in the 18% of participants with an outstanding loan.

Industry, Legal and Regulatory Updates

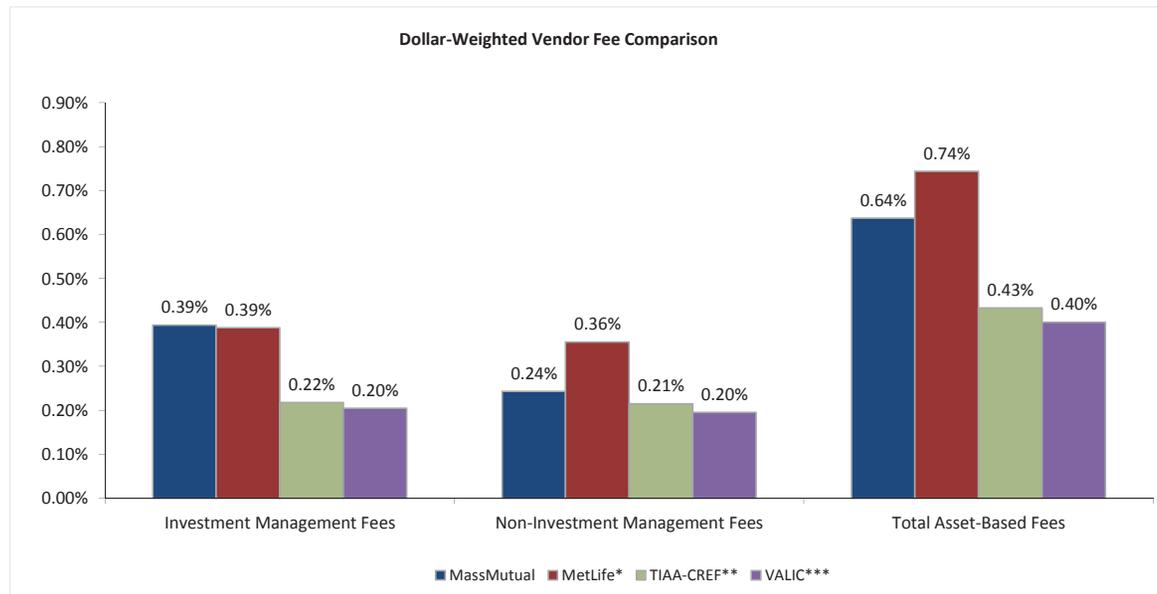

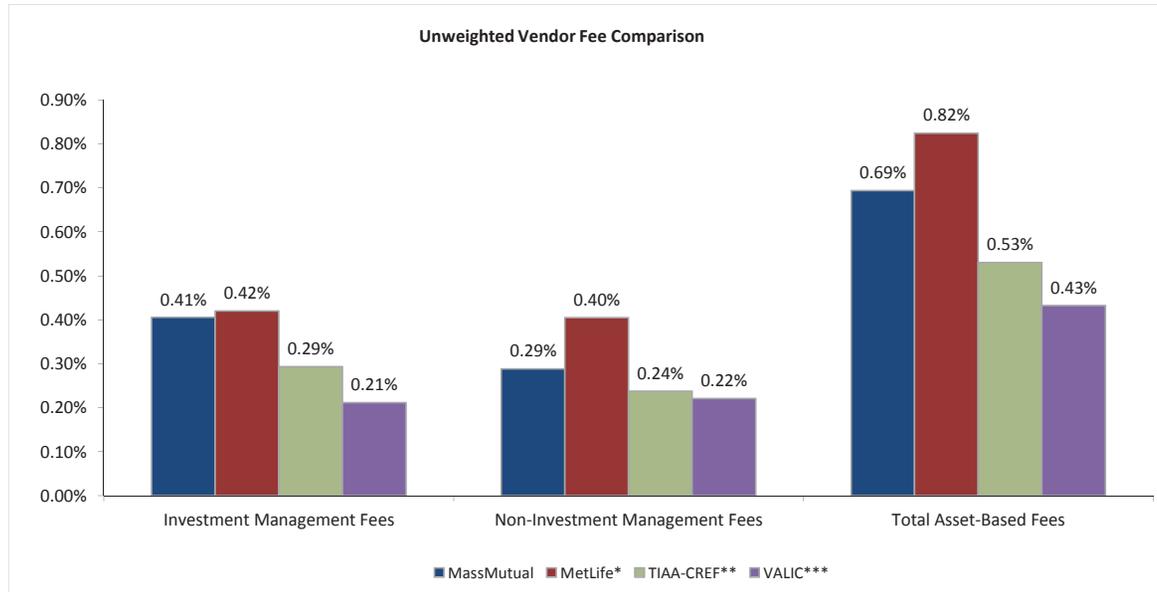

- The Investment Company Institute (ICI) reported that U.S. retirement assets increased to \$24 trillion as of June 30, 2014. This includes \$6.6 trillion (28%) in defined contribution assets, with 401(k) plans (\$4.4 trillion) representing the largest portion of that segment.
- The Department of Labor issued a request for information to learn more about usage of self-directed brokerage windows offered within participant directed plans to determine if additional regulation or enhanced disclosures covering the use of windows is needed.
- The Senate Finance Committee will examine tax reforms as they relate to retirement savings accounts. At issue is a report issued by the Government Accountability Office (GAO) that indicated the current system allows high income earners to use IRAs as a tax shelter.

Note: The above information is courtesy of Pensions & Investments and other industry sources.

**South Carolina State ORP Total Plan Allocation
As of September 30, 2014**

Vendor Fee Comparison As of September 30, 2014

Notes:

*The Total Dollar-Weighted Asset-Based Fee for MetLife includes an 13 bps Admin Charge.

**TIAA-CREF has provided an explicit fee on its Traditional Annuity of 55 bps including 15 bps of revenue share. This was not included to maintain consistency of methodology.

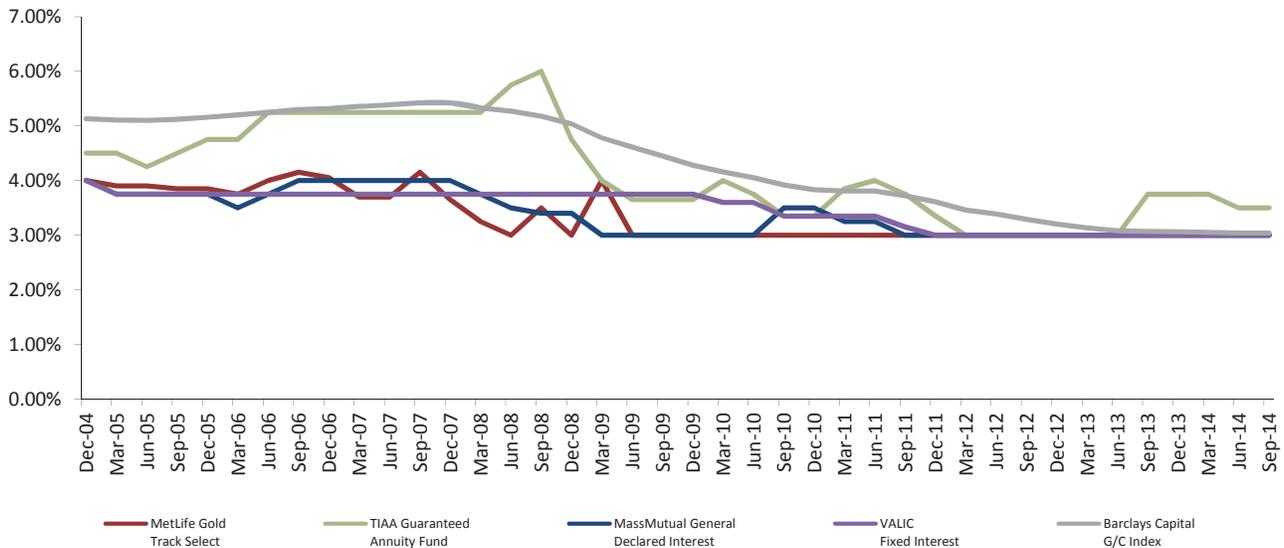

***The Total Dollar-Weighted Asset-Based Fee for VALIC includes a 20 bps Admin Charge.

Revenue share is updated on an annual basis every fiscal year, market values and fund expense ratios are updated quarterly.

All vendor dollar-weighted fees are artificially low due to high allocations to fixed interest funds which do not have an explicit expense ratio.

Methodology

(P) Passive Funds

Passive funds are expected to maintain a tracking error of 50 bps or less.

Active Funds

¹Fund performance exceeds the return of the independent benchmark for at least two of the most recent one, three, and five-year trailing periods.

²Fund performance exceeds the 50th percentile rank within the applicable peer universe for at least two of the most recent one, three, and five-year trailing periods.

³Information ratio exceeds the 50th percentile within the applicable peer universe for at least two of the most recent one, three, and five-year trailing periods.

⁴Sharpe ratio exceeds the 50th percentile within the applicable peer universe for at least two of the most recent one, three, and five-year trailing periods.

⁵Number represents the number of quarters (consecutive or non-consecutive) the fund has been on the watch list over the previous trailing 12 quarters.

Fund Objective

The Fund seeks total return, consisting of long-term capital appreciation and current income. Normally, the Fund invests at least 80% of its net assets in equity securities of U.S. companies that have large market capitalizations and that the advisor believes have the potential for long-term growth and current income.

Methodology

(P) Passive Funds

Passive funds are expected to maintain a tracking error of 50 bps or less.

Active Funds

¹Fund performance exceeds the return of the independent benchmark for at least two of the most recent one, three, and five-year trailing periods.

²Fund performance exceeds the 50th percentile rank within the applicable peer universe for at least two of the most recent one, three, and five-year trailing periods.

³Information ratio exceeds the 50th percentile within the applicable peer universe for at least two of the most recent one, three, and five-year trailing periods.

⁴Sharpe ratio exceeds the 50th percentile within the applicable peer universe for at least two of the most recent one, three, and five-year trailing periods.

⁵Number represents the number of quarters (consecutive or non-consecutive) the fund has been on the watch list over the previous trailing 12 quarters.

*The Royce Premier fund is scheduled to be removed from the Plan and replaced with the Delaware Small Cap Core Inst (DCCIX) fund on 10/31/2014.

Methodology

(P) Passive Funds

Passive funds are expected to maintain a tracking error of 50 bps or less.

Active Funds

¹Fund performance exceeds the return of the independent benchmark for at least two of the most recent one, three, and five-year trailing periods.

²Fund performance exceeds the 50th percentile rank within the applicable peer universe for at least two of the most recent one, three, and five-year trailing periods.

³Information ratio exceeds the 50th percentile within the applicable peer universe for at least two of the most recent one, three, and five-year trailing periods.

⁴Sharpe ratio exceeds the 50th percentile within the applicable peer universe for at least two of the most recent one, three, and five-year trailing periods.

⁵Number represents the number of quarters (consecutive or non-consecutive) the fund has been on the watch list over the previous trailing 12 quarters.

Style Analysis - 3 Years

Fund Objective

The Fund seeks long-term growth of capital and income. The Fund invests mainly in large- and mid-capitalization companies whose stocks are considered to be undervalued. Undervalued stocks generally trade at prices that are below average in relation to such measures as earnings and book value.

Style Analysis - 3 Years

Fund Objective

The Fund seeks to track the performance of a benchmark index that measures the investment return of mid-capitalization stocks. The Fund employs a "passive management" approach designed to track the performance of the CRSP US Mid Cap Index, a broadly diversified index of stocks of medium-size U.S. companies.

Product Objective

The fund seeks a long-term rate of return that outpaces inflation, primarily through investment in inflation-indexed bonds issued or guaranteed by the U.S. government or its agencies, or by corporations and other U.S.-domiciled issuers, as well as by foreign governments. The fund can also invest in money market instruments.

Methodology

(P) Passive Funds

Passive funds are expected to maintain a tracking error of 50 bps or less.

Active Funds

¹Fund performance exceeds the return of the independent benchmark for at least two of the most recent one, three, and five-year trailing periods.

²Fund performance exceeds the 50th percentile rank within the applicable peer universe for at least two of the most recent one, three, and five-year trailing periods.

³Information ratio exceeds the 50th percentile within the applicable peer universe for at least two of the most recent one, three, and five-year trailing periods.

⁴Sharpe ratio exceeds the 50th percentile within the applicable peer universe for at least two of the most recent one, three, and five-year trailing periods.

⁵Number represents the number of quarters (consecutive or non-consecutive) the fund has been on the watch list over the previous trailing 12 quarters.

Glossary

<u>Term</u>	<u>Description</u>
Simple Alpha (Excess or Relative Return)	The arithmetic difference between the portfolio's return and the benchmark's return.
Alpha	A measure of the difference between a portfolio's actual returns and its expected performance, given its level of risk as measured by beta. It is a measure of the portfolio's historical performance not explained by movements of the market, or a portfolio's non-systematic return.
Asset Allocation Effect	In attribution analysis, the incremental return attributable to diverging from the target weights of the policy benchmark holding all other factors constant.
Beta	Also called systematic risk or non-diversifiable risk, beta measures the sensitivity of asset returns to the market (benchmark). In isolation a lower beta is considered less risky but does not distinguish between upside and downside risk.
Consistency	The percentage of periods that a product achieved a rate of return higher than that of its benchmark. The higher the consistency figure, the more value a manager has contributed to the product's performance.
Down Market Capture	The ratio of average portfolio return over the benchmark during periods of negative benchmark return. Lower values indicate better product performance.
Excess Risk	A measure of the standard deviation of a portfolio's performance relative to the risk free return.
Information Ratio	Measured by dividing the active rate of return by the tracking error. The higher the Information Ratio, the more value-added contribution by the manager. Negative Information Ratios are difficult to interpret.
Manager Value-Added (Selection Effect)	In attribution analysis, the incremental return attributable to active management; the result of diverging from the benchmark allocation within a given asset class.
Market Timing / Other	In attribution analysis, represents the impact of intra-period shifts in asset allocation. For example a rapidly appreciating asset could have markedly different weights throughout the analysis period (which looks at fixed points in time).

Glossary

R-Squared	The percentage of portfolio performance explained by the performance of its benchmark; measured on a scale of 0 to 100, with 100 indicating that the portfolio's performance is entirely determined by the benchmark.
Sharpe Ratio	Also called the reward-to-variability ratio, Sharpe Ratio measures the absolute rate of return per unit of risk and is calculated as the Excess Return vs. the Risk Free Rate divided by the standard deviation of the Excess Return. Investors prefer higher Sharpe Ratios (more return per unit of risk).
Standard Deviation	Typically referred to as Volatility or Risk, standard deviation measures the dispersion of actual returns around their average.
Tracking Error	A measure of the standard deviation of a portfolio's performance relative to the performance of an appropriate market benchmark.
Treynor Ratio	Similar to Sharpe ratio, but focuses on beta rather than excess risk (standard deviation). Represents the excess rate of return over the risk free rate divided by the beta. The result is the absolute rate of return per unit of risk. The higher the value, the better the product's historical risk-adjusted performance.
Up Market Capture	The ratio of average portfolio return over the benchmark during periods of positive benchmark return. Higher values indicate better product performance.

DISCLAIMER

Summit Strategies Group (Summit) has prepared this report for the exclusive use by the client for which it was prepared. The information herein was obtained from various sources, such as the client's custodian(s) accounting statements, commercially available databases, and other economic and financial market data sources.
